

Nama : Ahmad Faris Al Muzakki

NIM : 2411089005

Mata Kuliah : Proyek

Perancangan Sistem Informasi E-Commerce Penjualan Pakaian

A. Teknologi yang digunakan

- a. Front-end : React js / Nuxt js
- b. Back-end : Golang

B. Fitur-fitur pada sistem

a. Halaman Home

Halaman home pada perancangan sistem informasi e-commerce bertujuan untuk memberikan beberapa informasi seperti produk, brand, dan informasi toko kepada pelanggan atau pengguna sistem.

b. Halaman Super Admin

Halaman Super admin pada perancangan sistem informasi e-commerce bertujuan untuk mengelola informasi toko seperti mengelola data user, pelanggan, produk, ongkir, pesanan, pembayaran, dan laporan

c. Halaman Admin

Halaman admin pada perancangan sistem informasi e-commerce bertujuan untuk mengelola data pemesanan pelanggan dan melakukan pengiriman produk pesanan pelanggan

d. Halaman Pelanggan

Halaman pelanggan pada perancangan sistem informasi e-commerce bertujuan untuk melakukan pesanan produk oleh pelanggan dan informasi lainnya mengenai pesanan pelanggan.

e. Manajemen Produk

Halaman manajemen produk dapat diakses oleh admin yang bertujuan untuk mengelola produk seperti menambahkan produk, mengedit produk, dan menghapus produk. Selain itu halaman ini juga mampu mengitung manajemen stok produk.

f. Pencarian Produk

Halaman pencarian produk bertujuan untuk melakukan pencarian produk berdasarkan nama produk dan kategori produk yang ingin dicari

g. Keranjang Produk

Keranjang produk bertujuan untuk memudahkan pelanggan setelah memiliki produk yang ingin dipesan oleh pelanggan sebelum melakukan pemesanan.

h. Proses Pembayaran

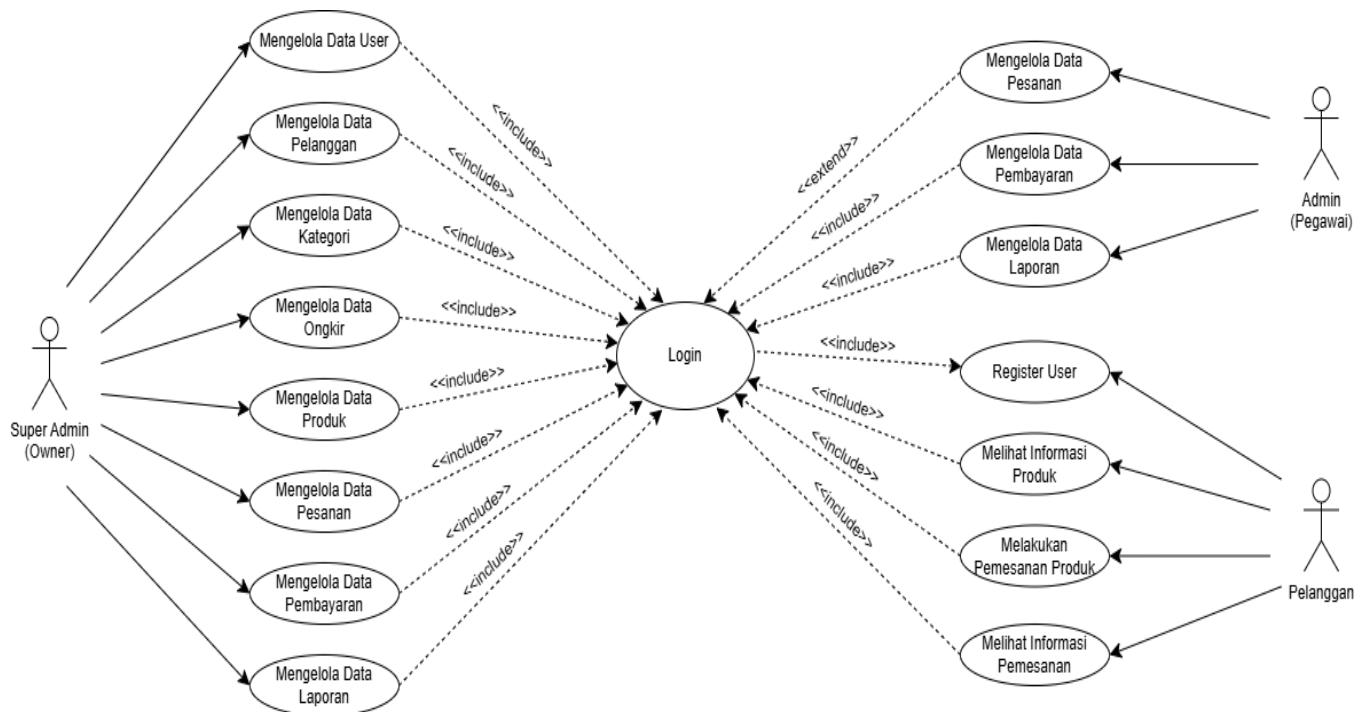

Proses pembayaran bertujuan untuk melakukan pembayaran setelah melakukan pemesanan. Pada halaman proses pembayaran saya rencana ingin menggunakan integrasi midtrans.

i. Riwayat Pesanan

Halaman riwayat pesanan bertujuan untuk mengetahui pesanan yang sudah dipesan oleh pelanggan setelah melakukan pemesanan produk

C. Use Case Diagram

Use case diagram adalah alat yang pemodelan data yang menggambarkan fungsi dan interaksi antara aktor dan sistem, serta tindakan yang dapat dilakukan oleh aktor terhadap sistem. Ini membantu dalam mengidentifikasi kebutuhan pengguna dan merancang fungsionalitas sistem secara efektif. Berikut gambaran rancangan use case diagram pada perancangan sistem informasi e-commerce penjualan Pakaian

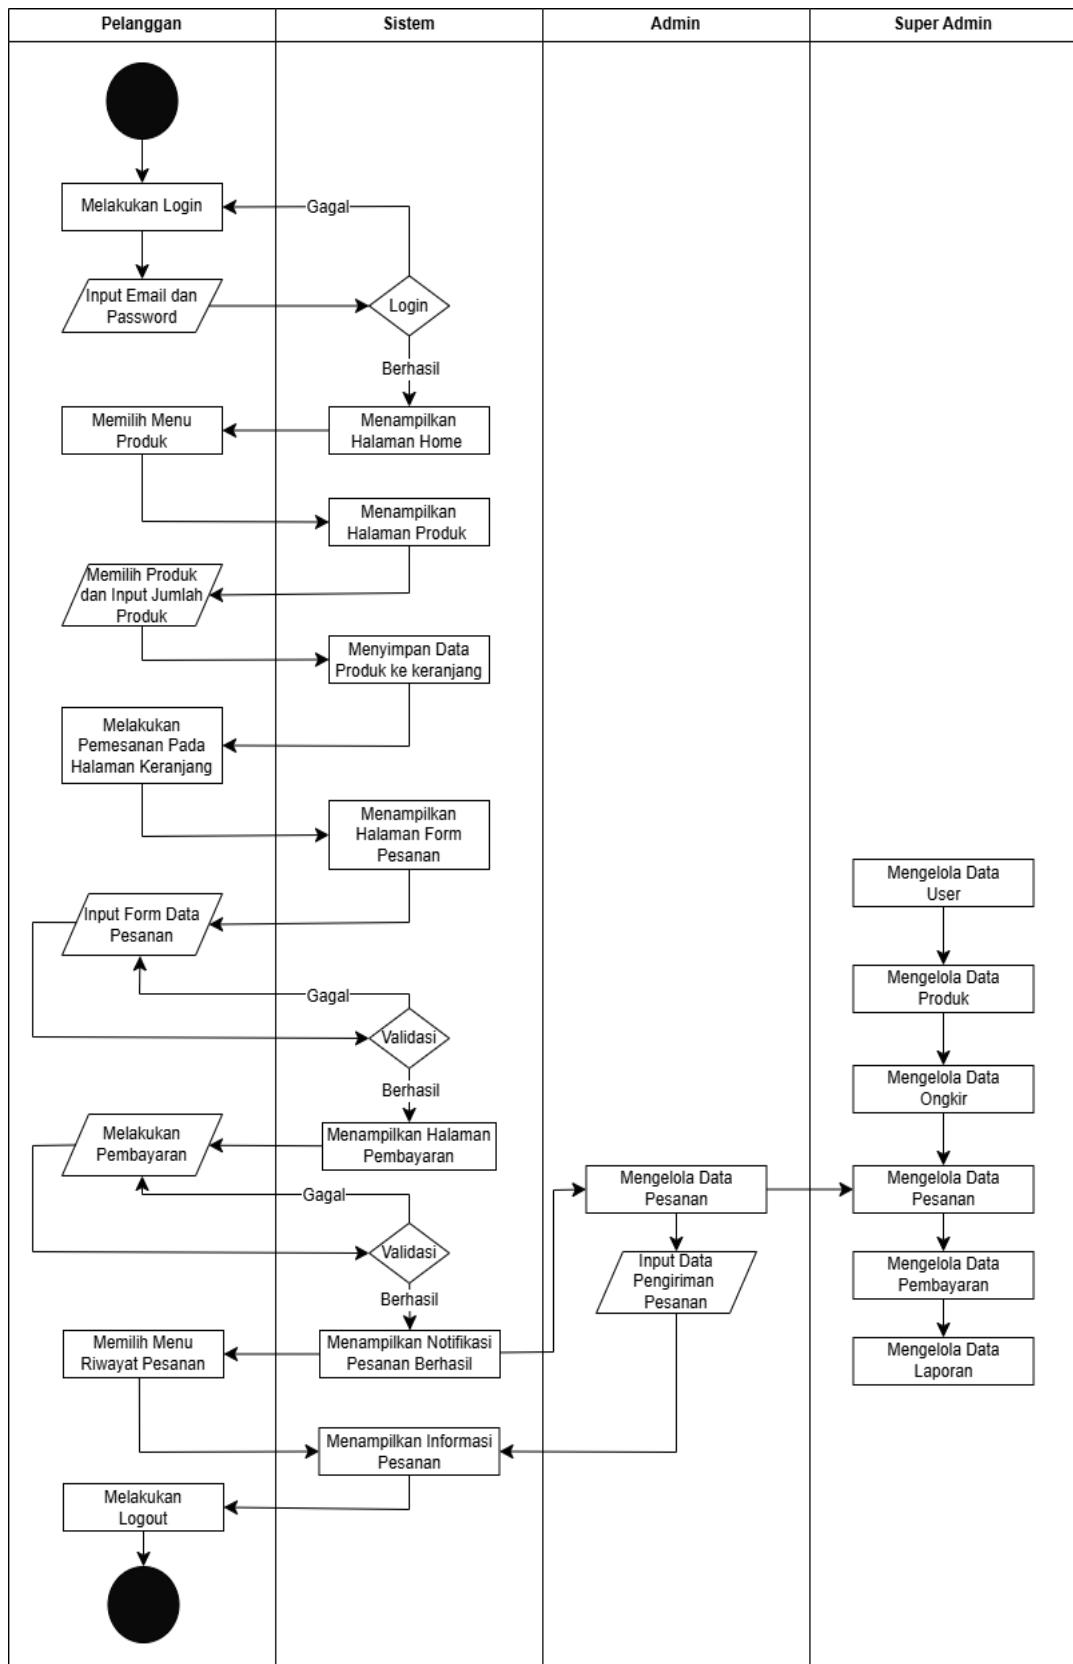

D. Activity Diagram

Activity diagram menggambarkan aliran aktivitas dalam sebuah proses, termasuk urutan aktivitas dan keputusan yang diambil di antara langkah-langkah tersebut. Diagram ini membantu dalam memahami bagaimana berbagai elemen berinteraksi dan bagaimana sistem bergerak dari satu keadaan ke keadaan lainnya. Dengan menggunakan simbol-simbol khusus, activity diagram dapat menunjukkan konkurensi (aktivitas yang terjadi bersamaan) dan iterasi (pengulangan aktivitas)

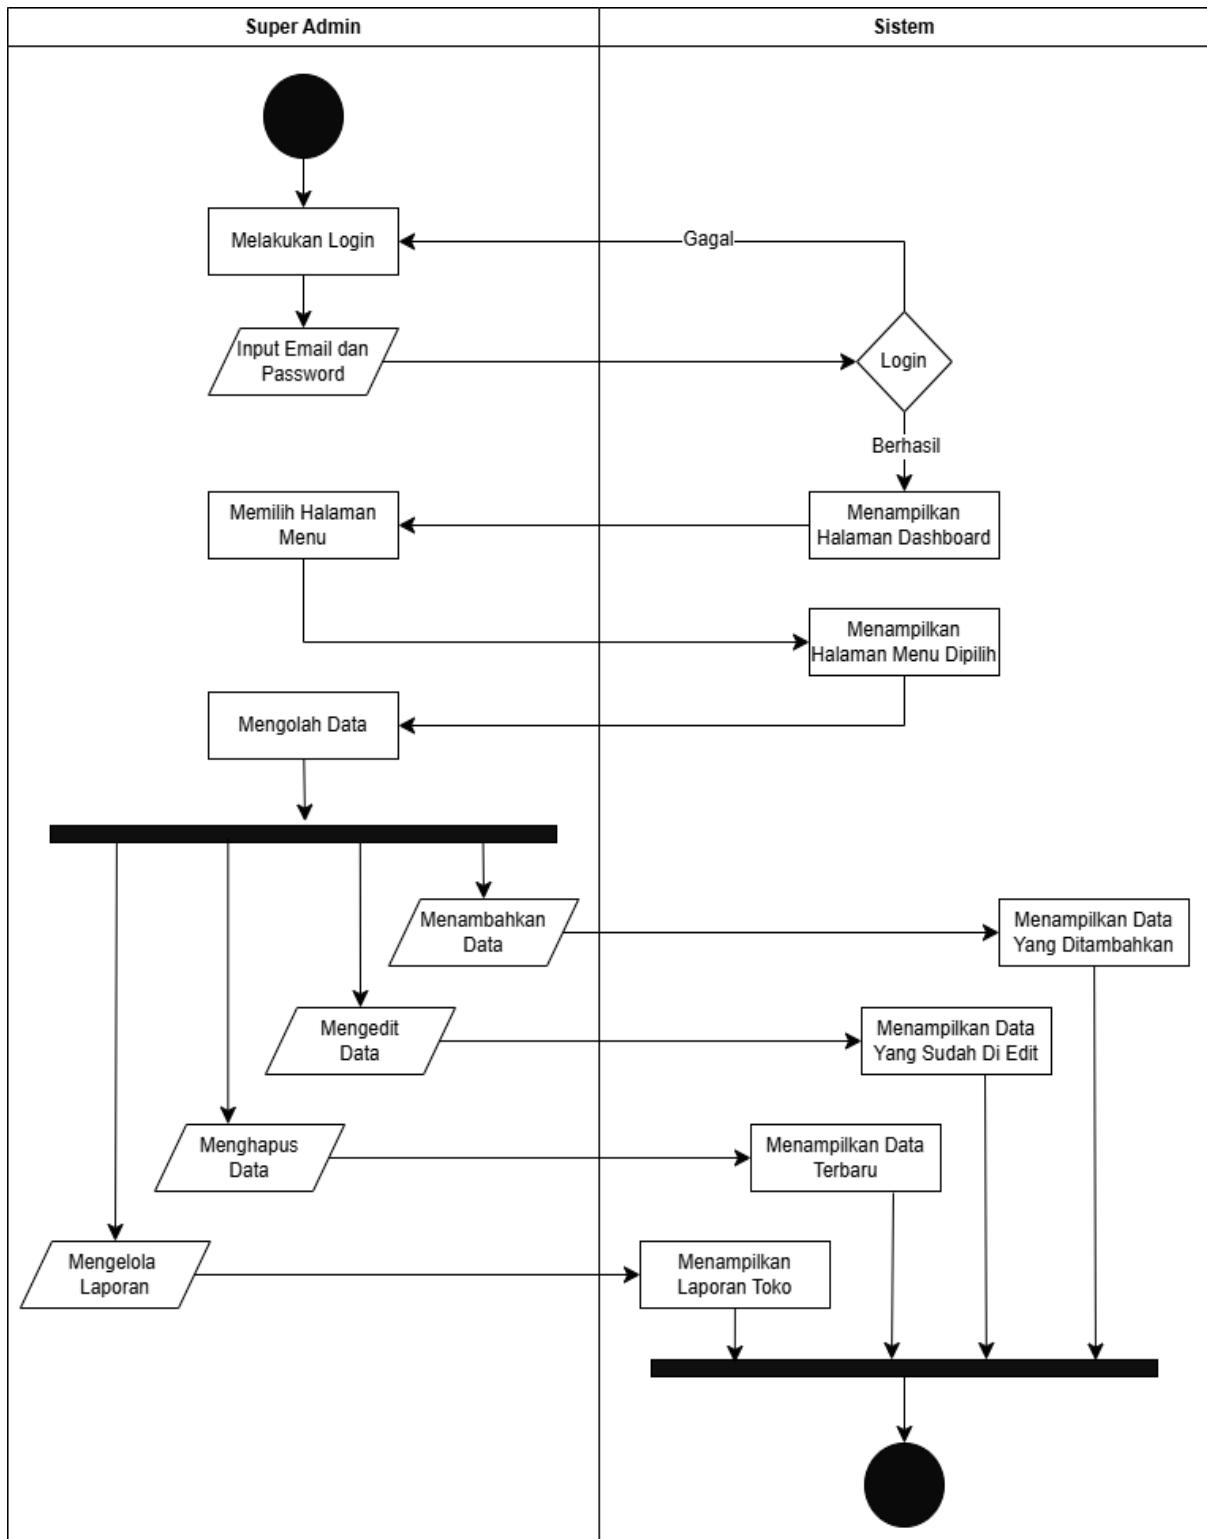

a. Activity Diagram Sistem E-Commerce

Berikut gambaran rancangan activity diagram sistem pada perancangan sistem informasi e-commerce penjualan Pakaian

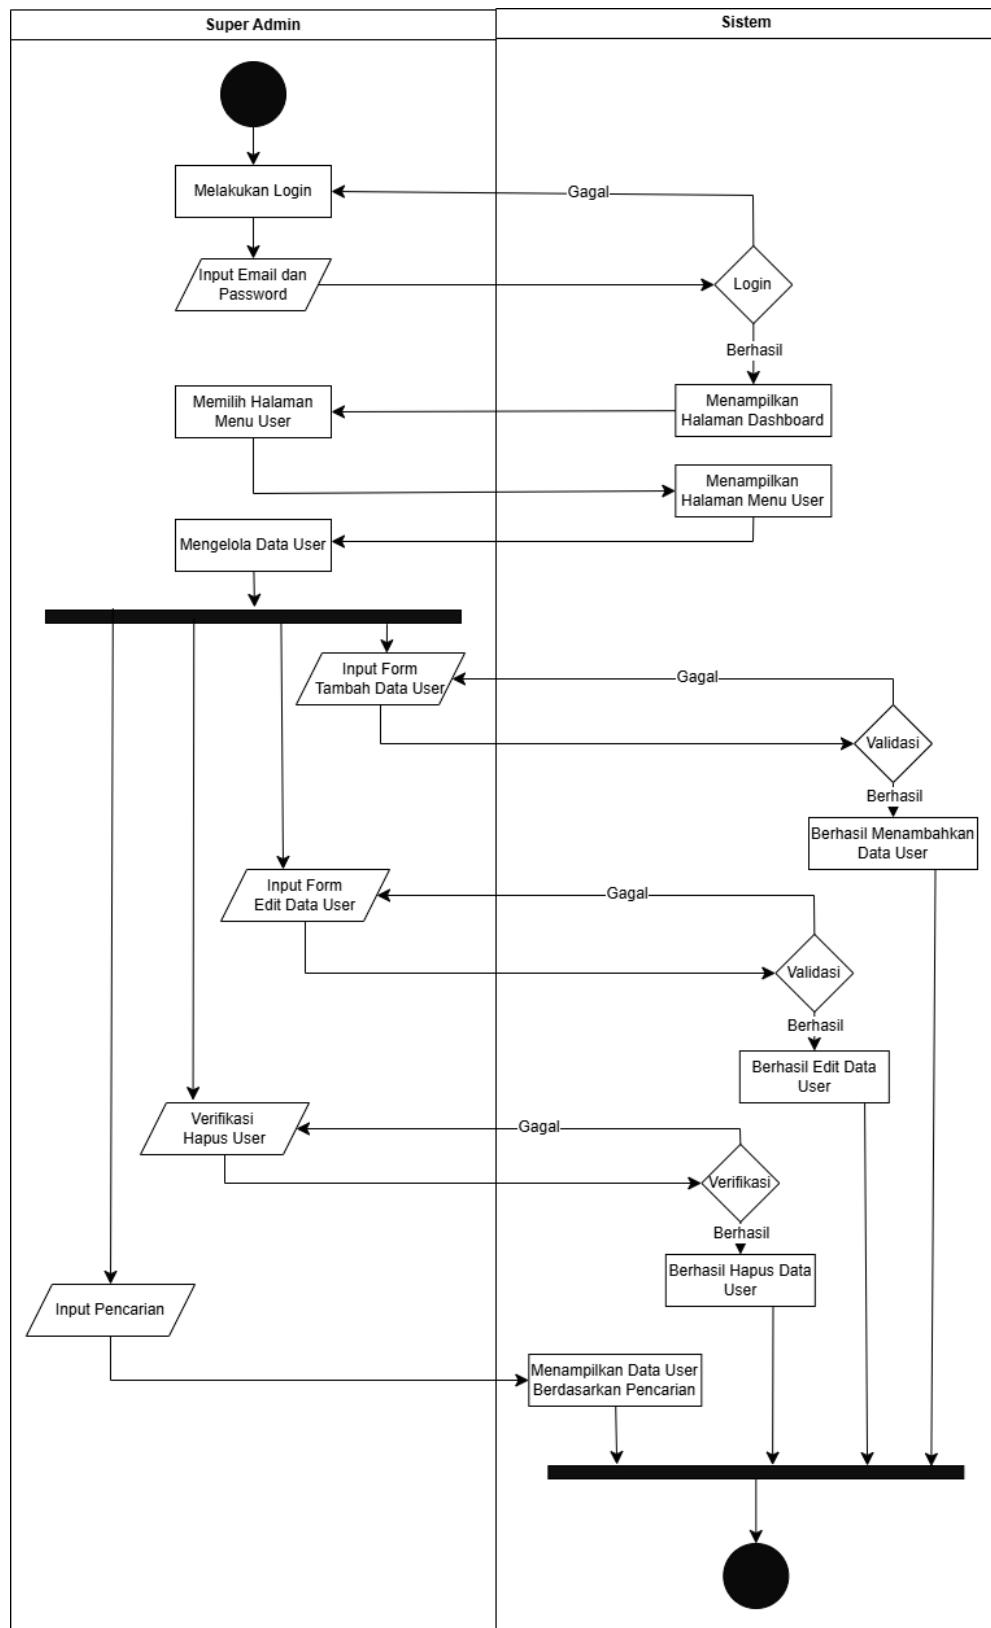

b. Activity Diagram Super Admin

Berikut gambaran rancangan activity diagram aktor super admin pada perancangan sistem informasi e-commerce penjualan Pakaian

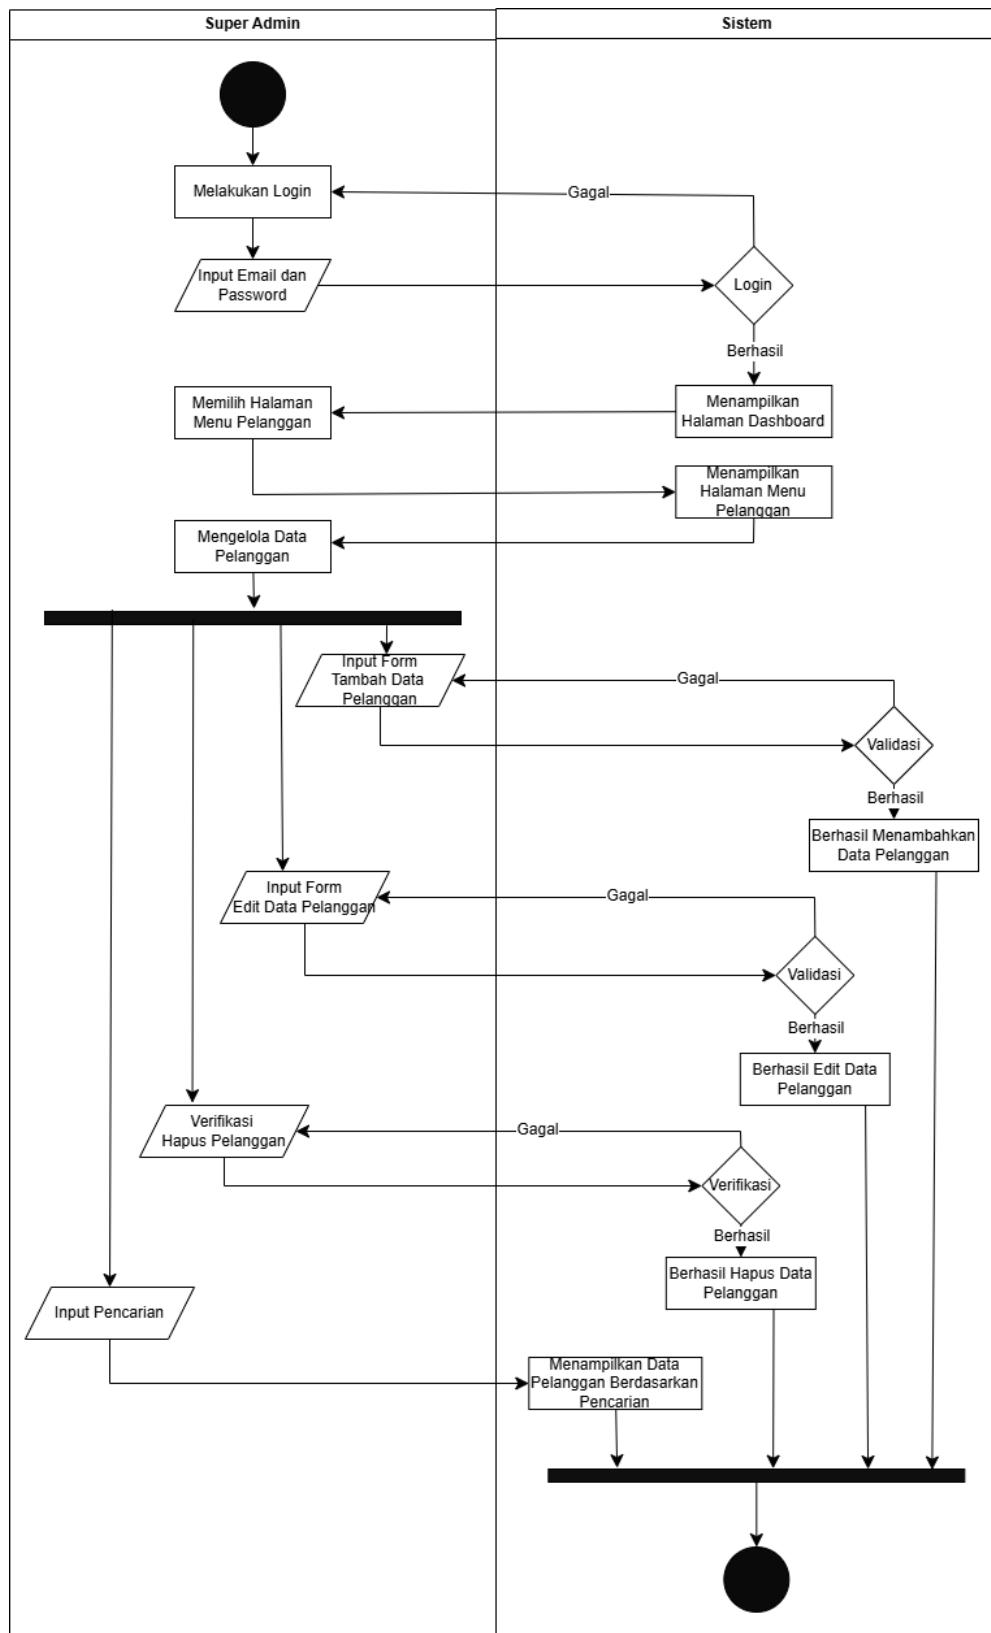

1. Activity Diagram Mengelola Data User

Berikut gambaran rancangan activity diagram peran super admin dalam mengelola data user pada perancangan sistem informasi e-commerce penjualan pakaian.

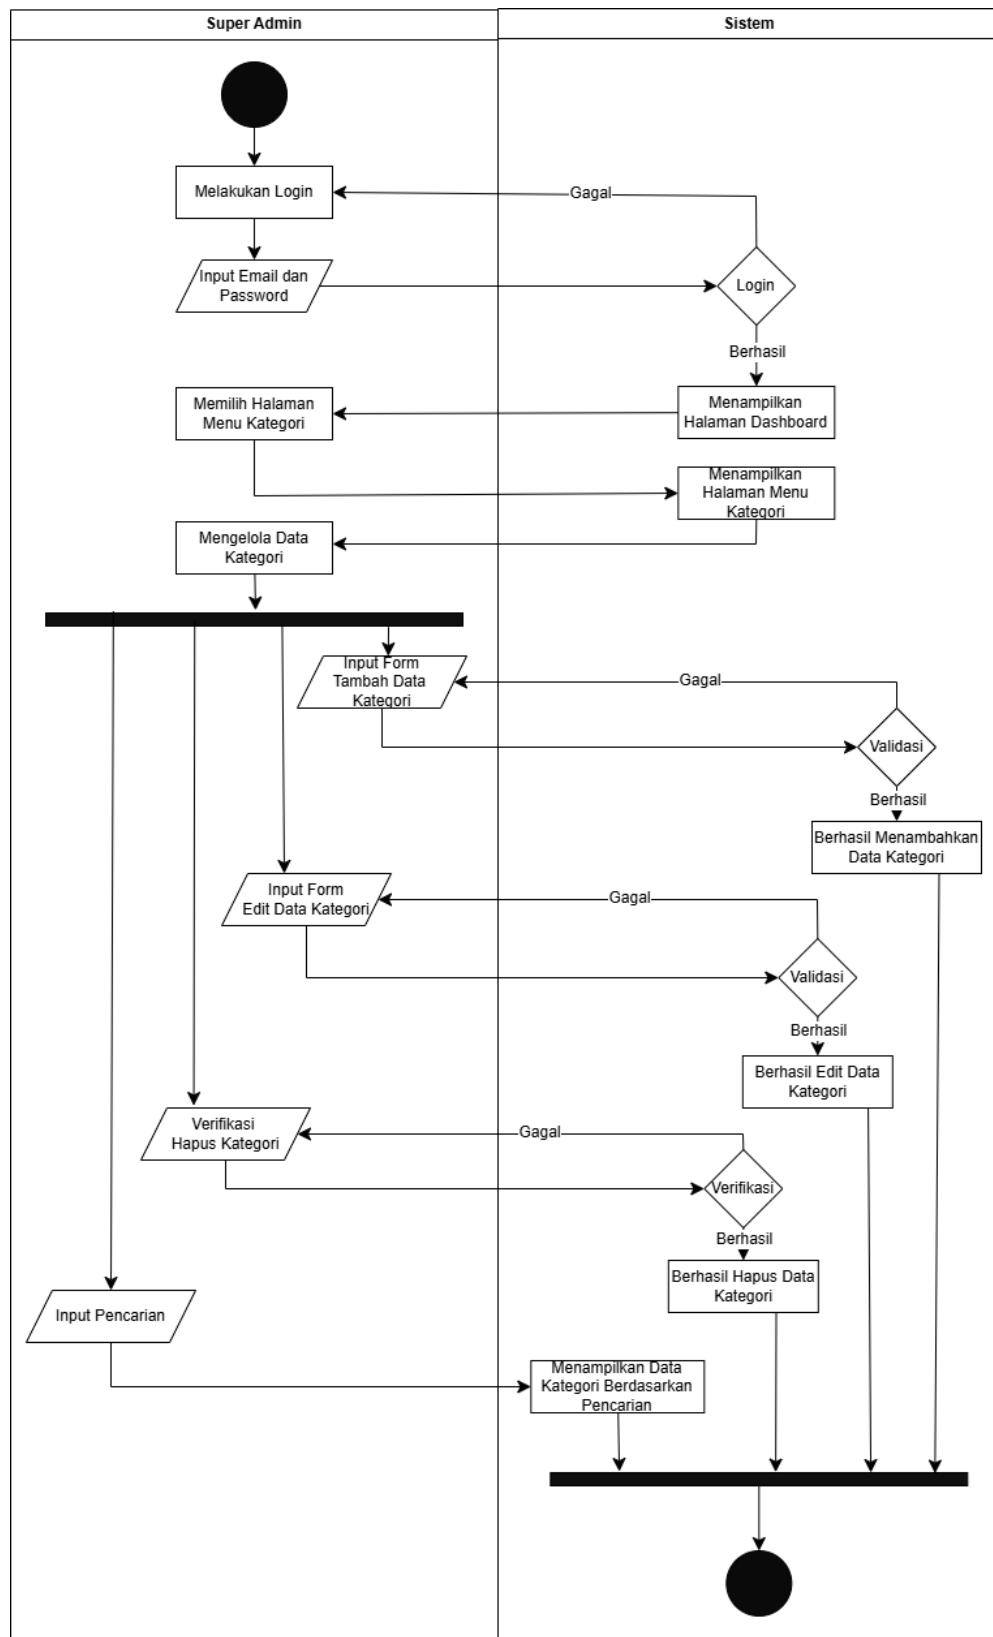

2. Activity Diagram Mengelola Data Pelanggan

Berikut gambaran rancangan activity diagram peran super admin dalam mengelola data pelanggan pada perancangan sistem informasi e-commerce penjualan pakaian.

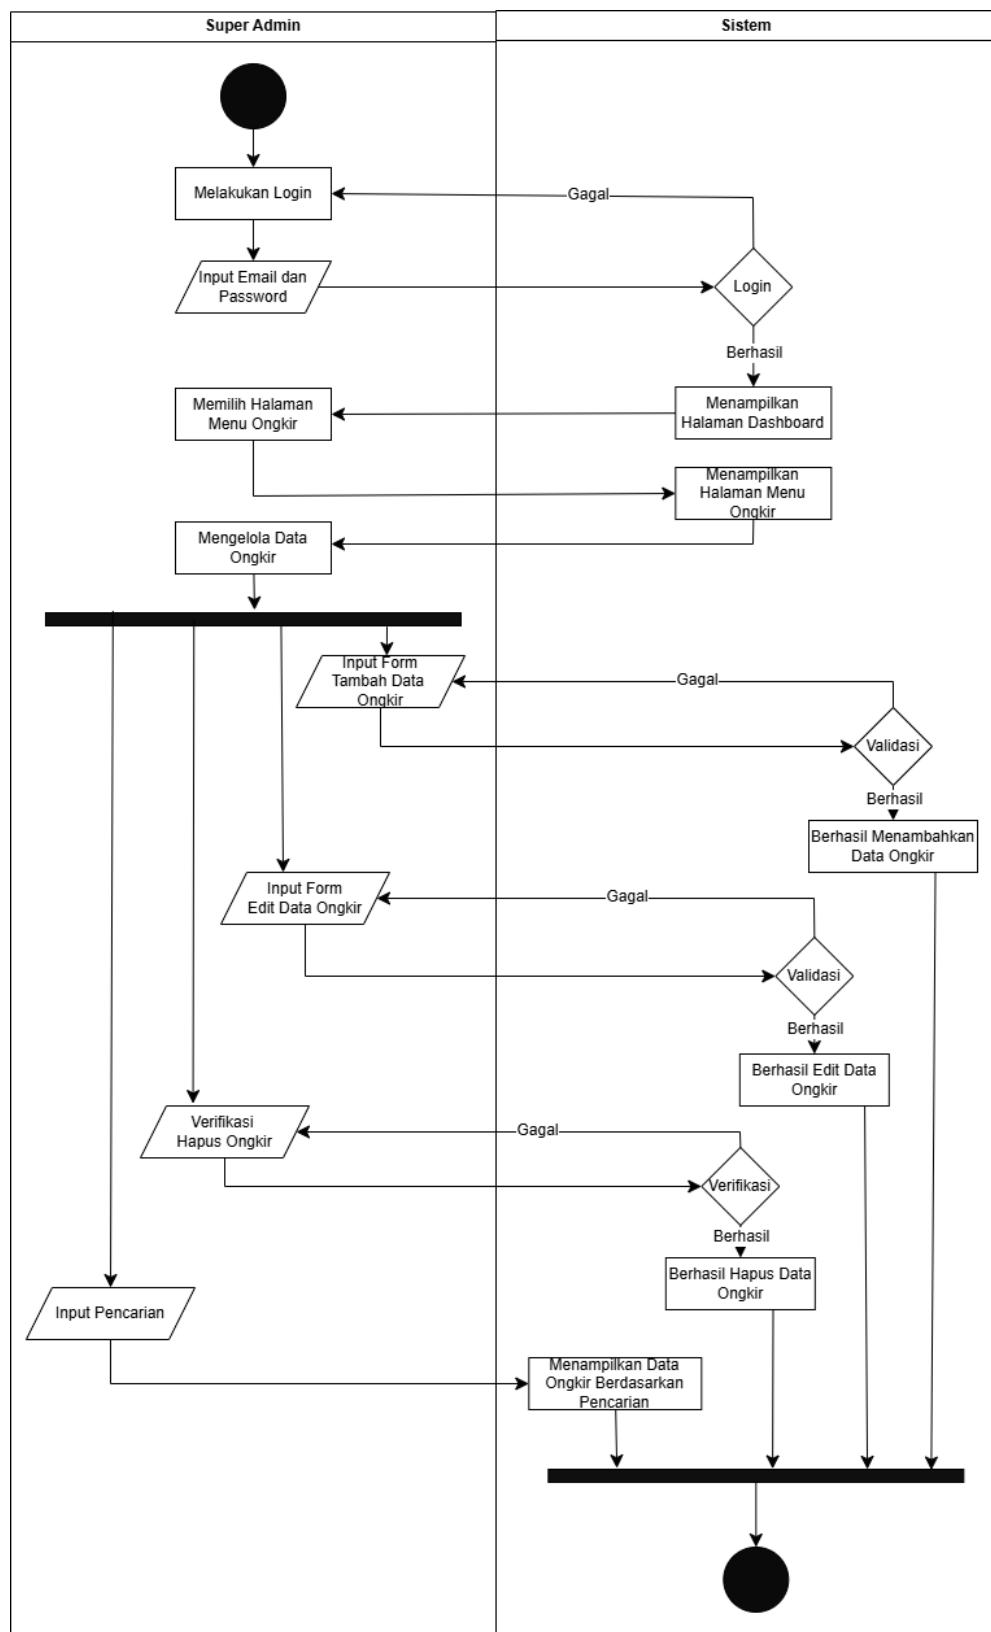

3. Activity Diagram Mengelola Data Kategori

Berikut gambaran rancangan activity diagram peran super admin dalam mengelola data kategori pada perancangan sistem informasi e-commerce penjualan pakaian.

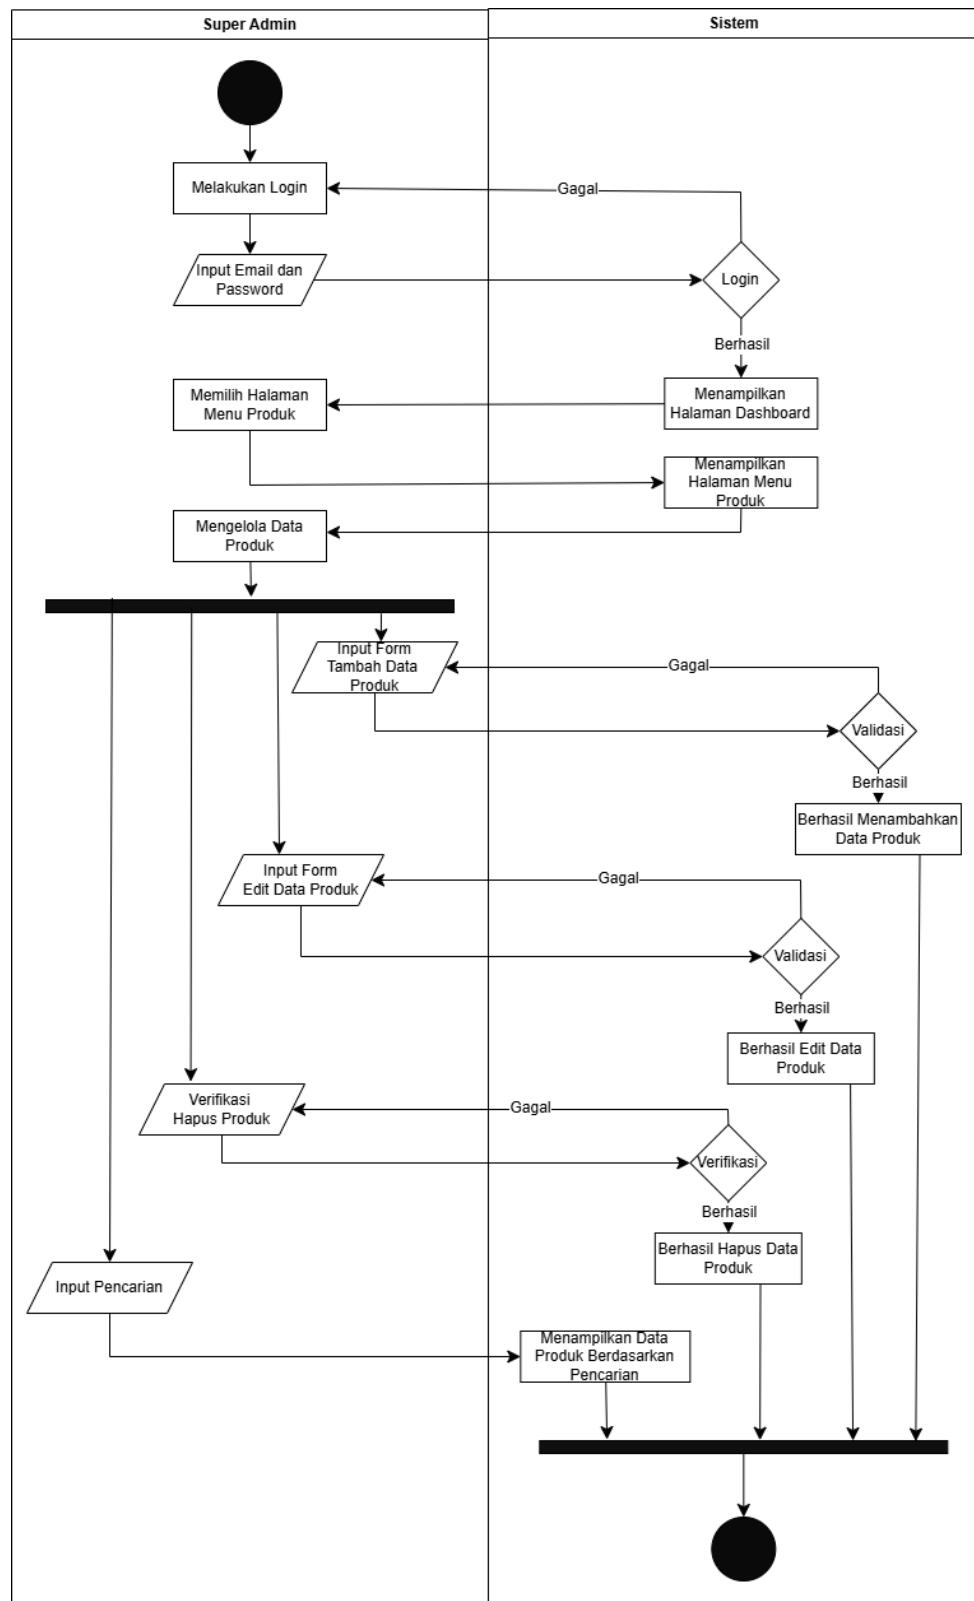

4. Activity Diagram Mengelola Data Ongkir

Berikut gambaran rancangan activity diagram peran super admin dalam mengelola data ongkir pada perancangan sistem informasi e-commerce penjualan pakaian.

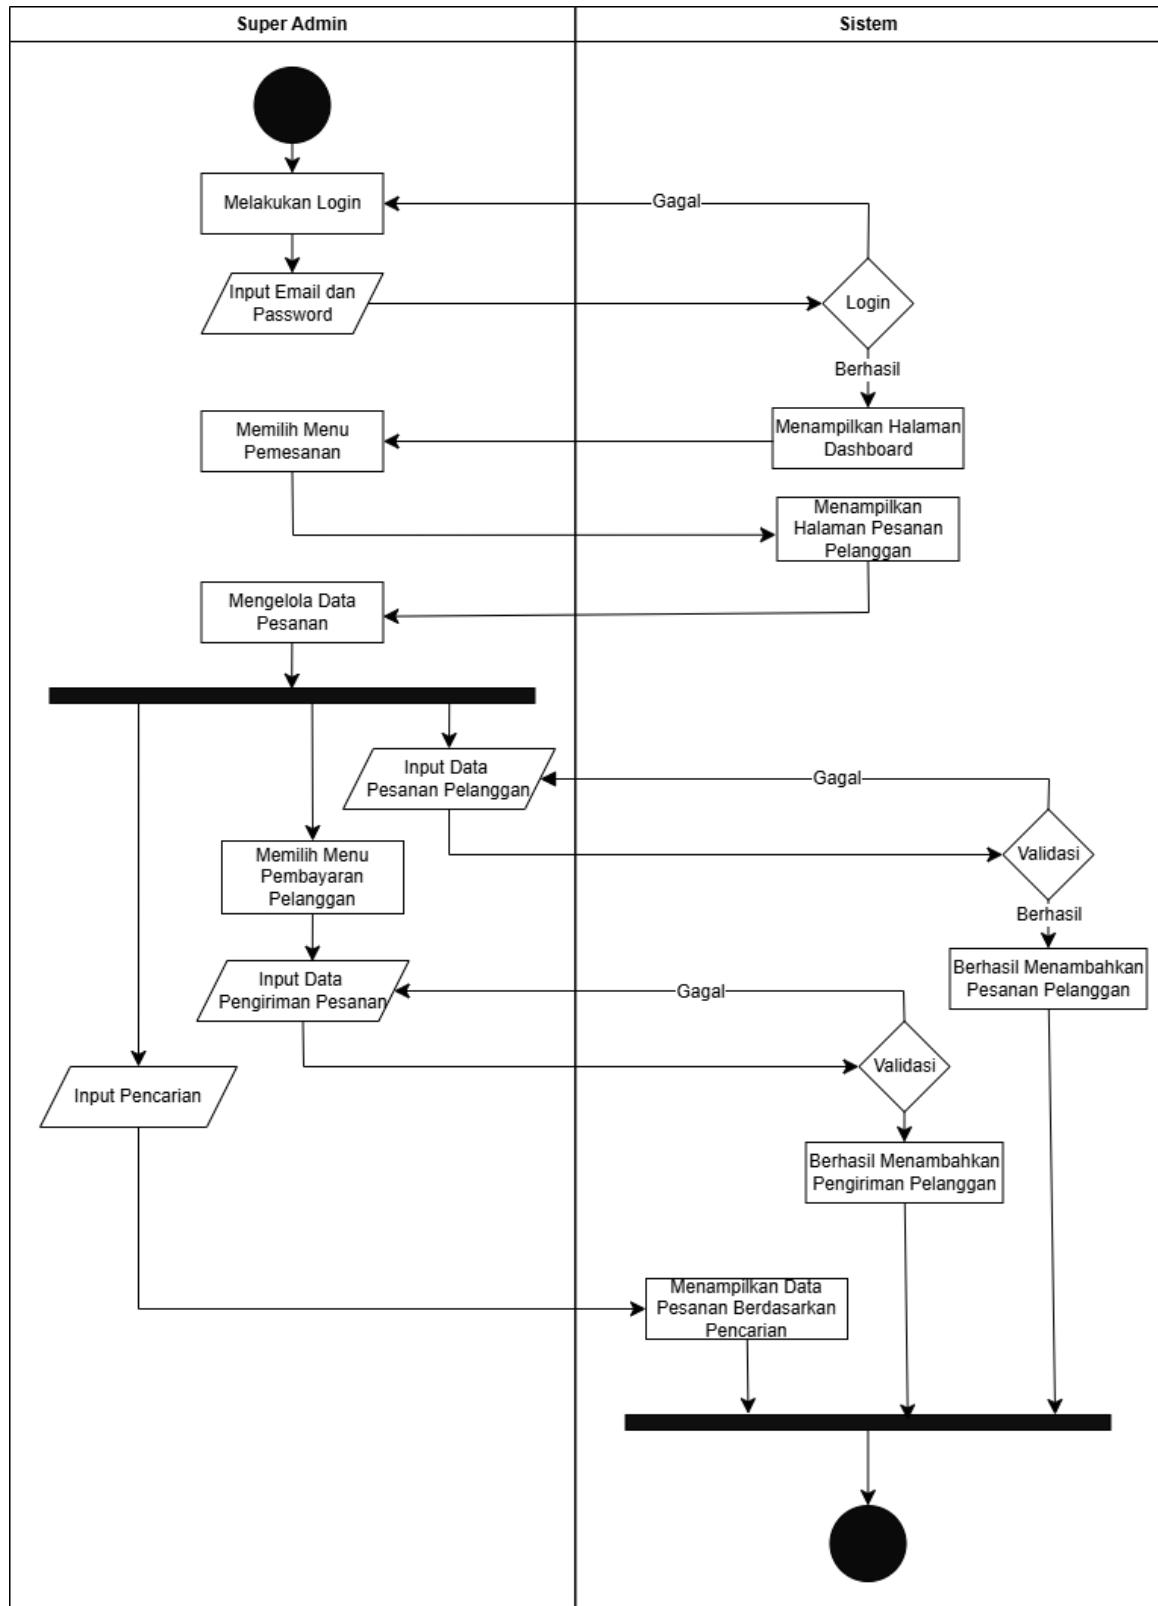

5. Activity Diagram Mengelola Data Produk

Berikut gambaran rancangan activity diagram peran super admin dalam mengelola data produk pada perancangan sistem informasi e-commerce penjualan pakaian.

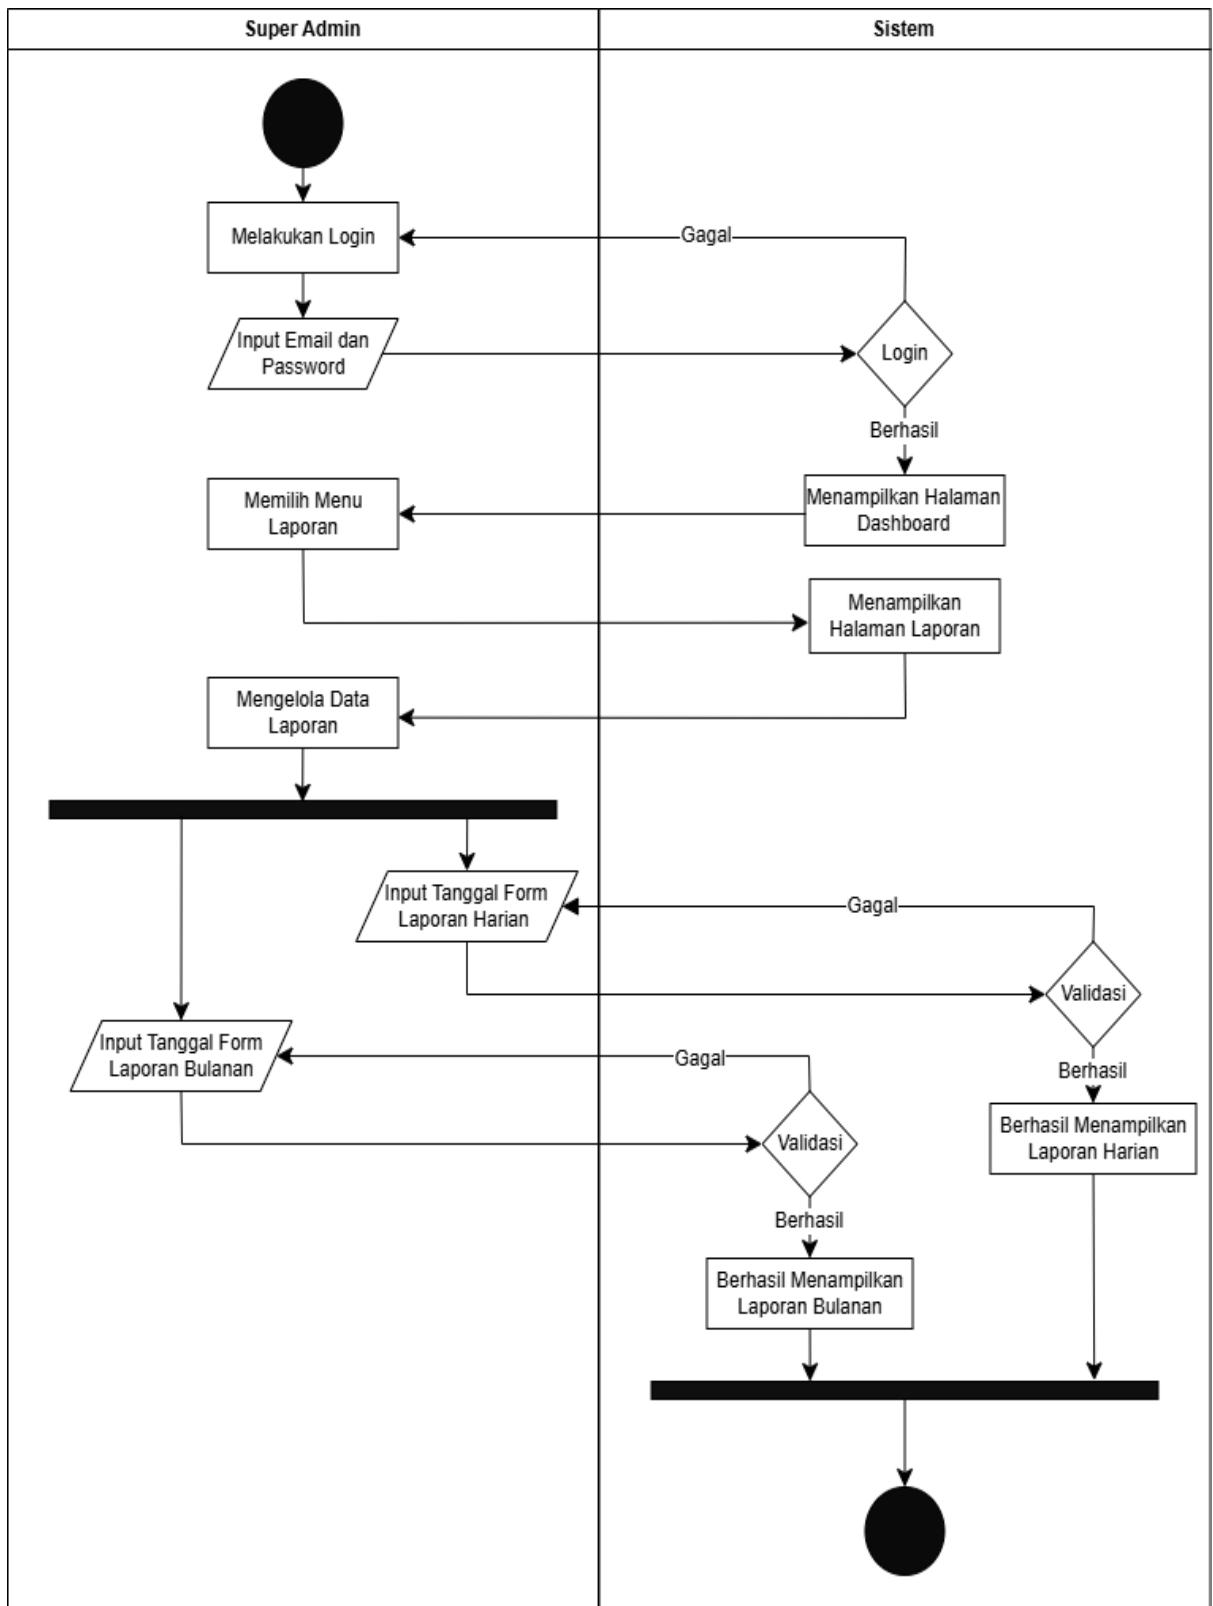

6. Activity Diagram Mengelola Data Pesanan dan Pembayaran

Berikut gambaran rancangan activity diagram peran super admin dalam mengelola data pesanan dan pembayaran pada perancangan sistem informasi e-commerce penjualan pakaian.

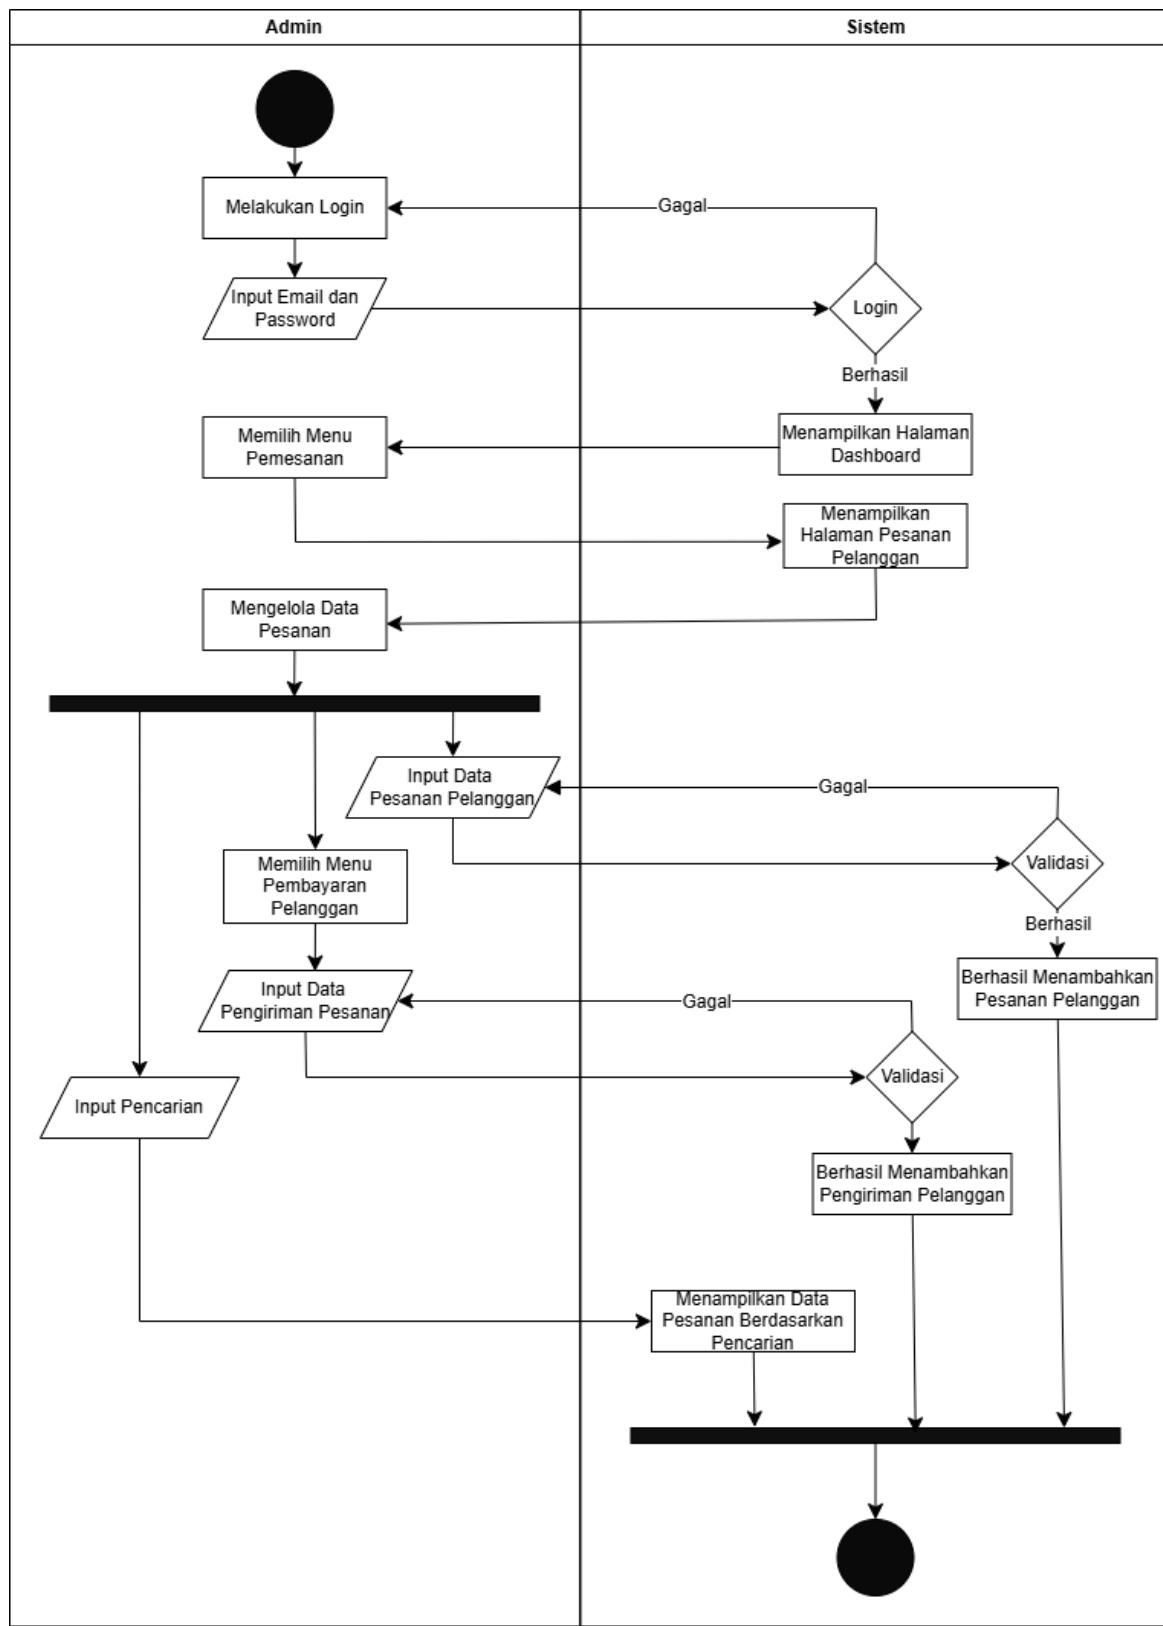

7. Activity Diagram Mengelola Laporan

Berikut gambaran rancangan activity diagram peran super admin dalam mengelola data laporan pada perancangan sistem informasi e-commerce penjualan pakaian.

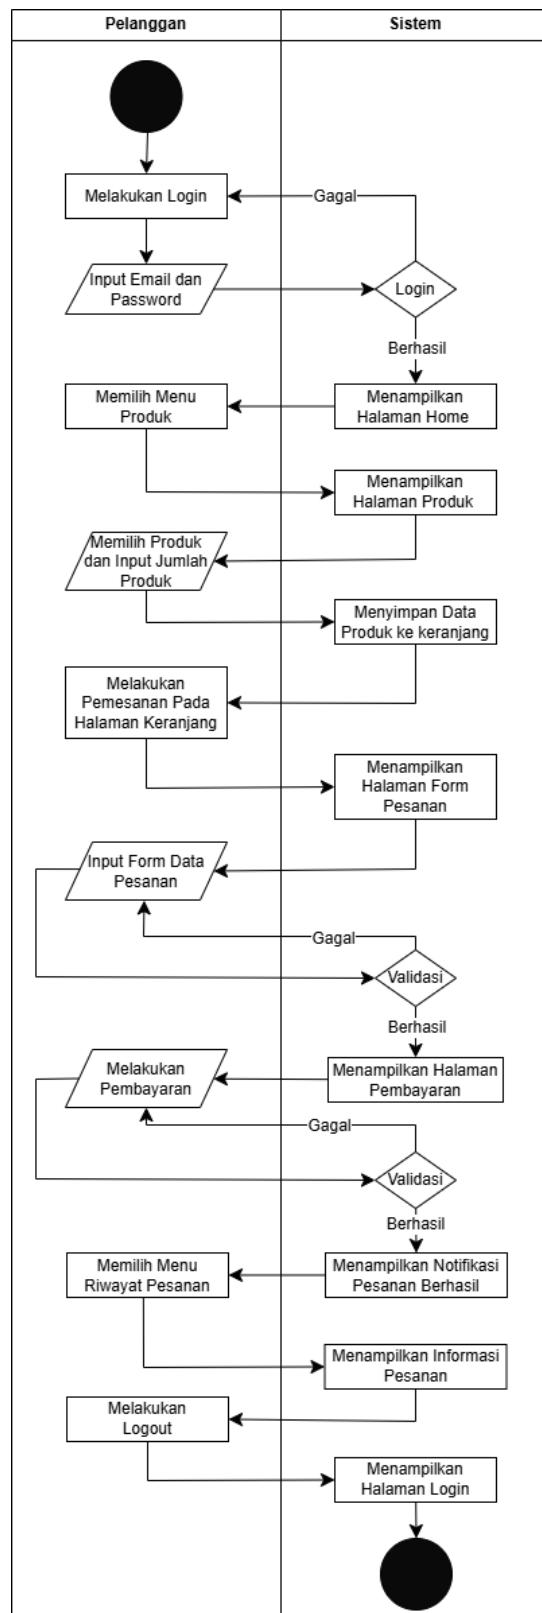

c. Activity Diagram Admin

Berikut gambaran rancangan activity diagram aktor admin pada perancangan sistem informasi e-commerce penjualan Pakaian

d. Activity Diagram Pelanggan

Berikut gambaran rancangan activity diagram aktor pelanggan pada perancangan sistem informasi e-commerce penjualan Pakaian

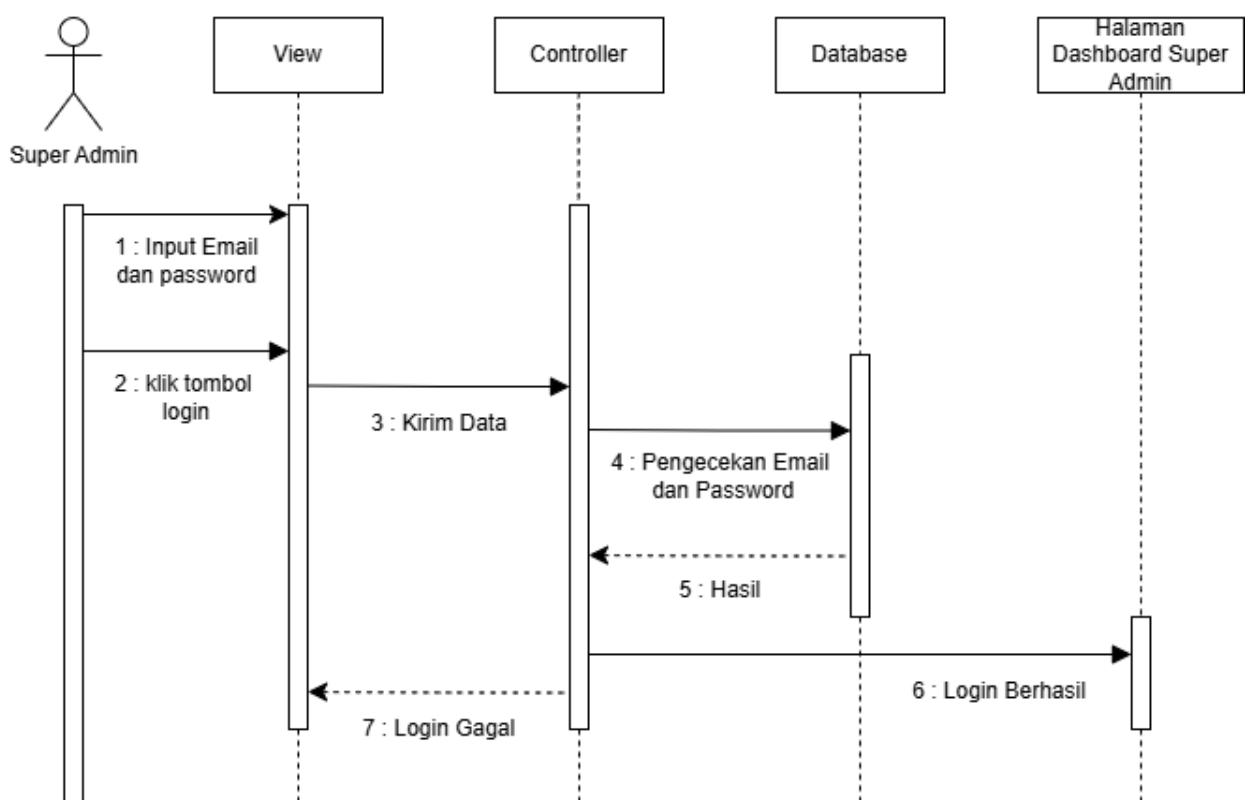

E. Sequence Diagram

Sequence diagram berfungsi untuk memperlihatkan alur interaksi antara objek-objek dalam sistem, dengan fokus pada waktu dan urutan kejadian. Dalam diagram ini, waktu ditampilkan secara vertikal, sementara objek-objek yang terlibat dalam proses diletakkan secara horizontal. Setiap objek memiliki lifeline yang menunjukkan periode aktifitasnya, dan interaksi antar objek digambarkan dengan pesan yang ditunjukkan melalui panah horizontal

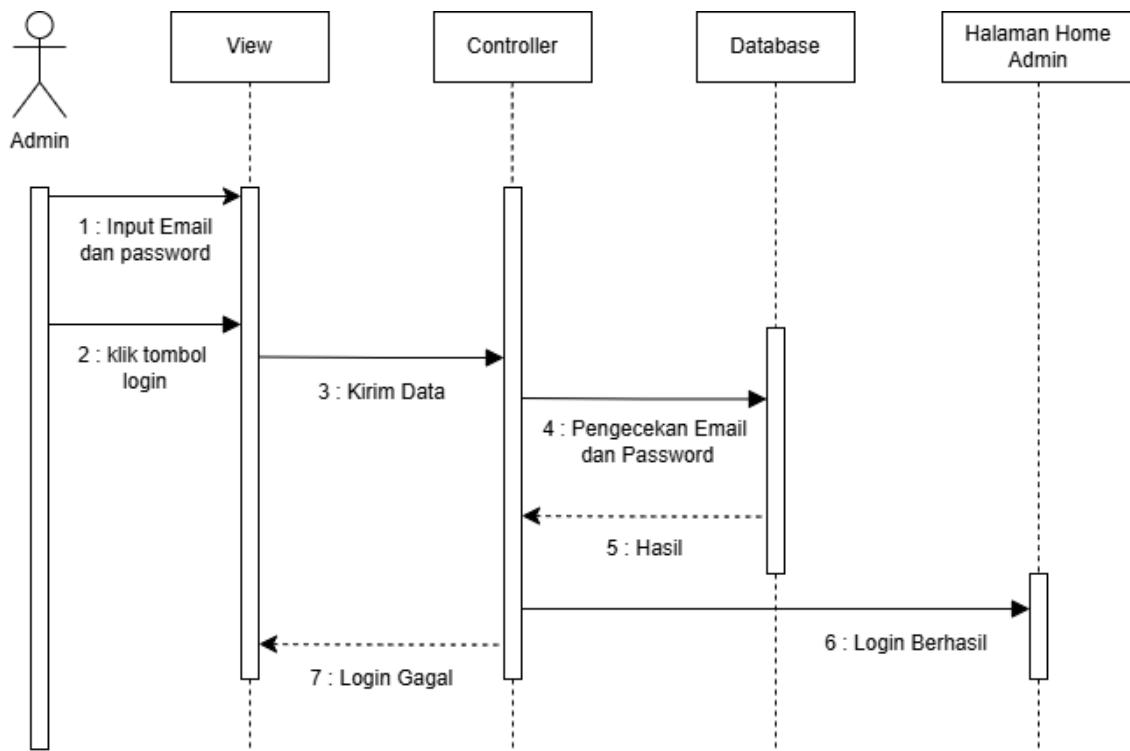

a. Sequence Diagram Login Super Admin

Berikut gambaran rancangan sequence diagram login super admin pada perancangan sistem informasi e-commerce penjualan Pakaian

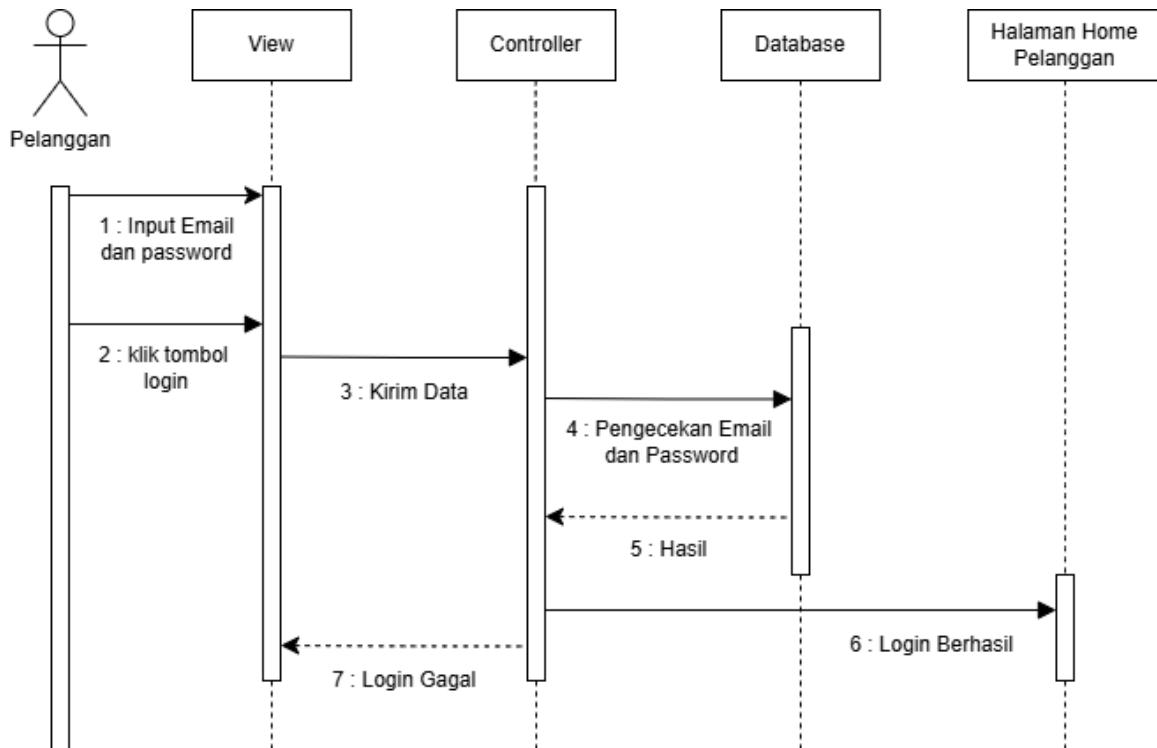

b. Sequence Diagram Login Admin

Berikut gambaran rancangan sequence diagram login admin pada perancangan sistem informasi e-commerce penjualan Pakaian

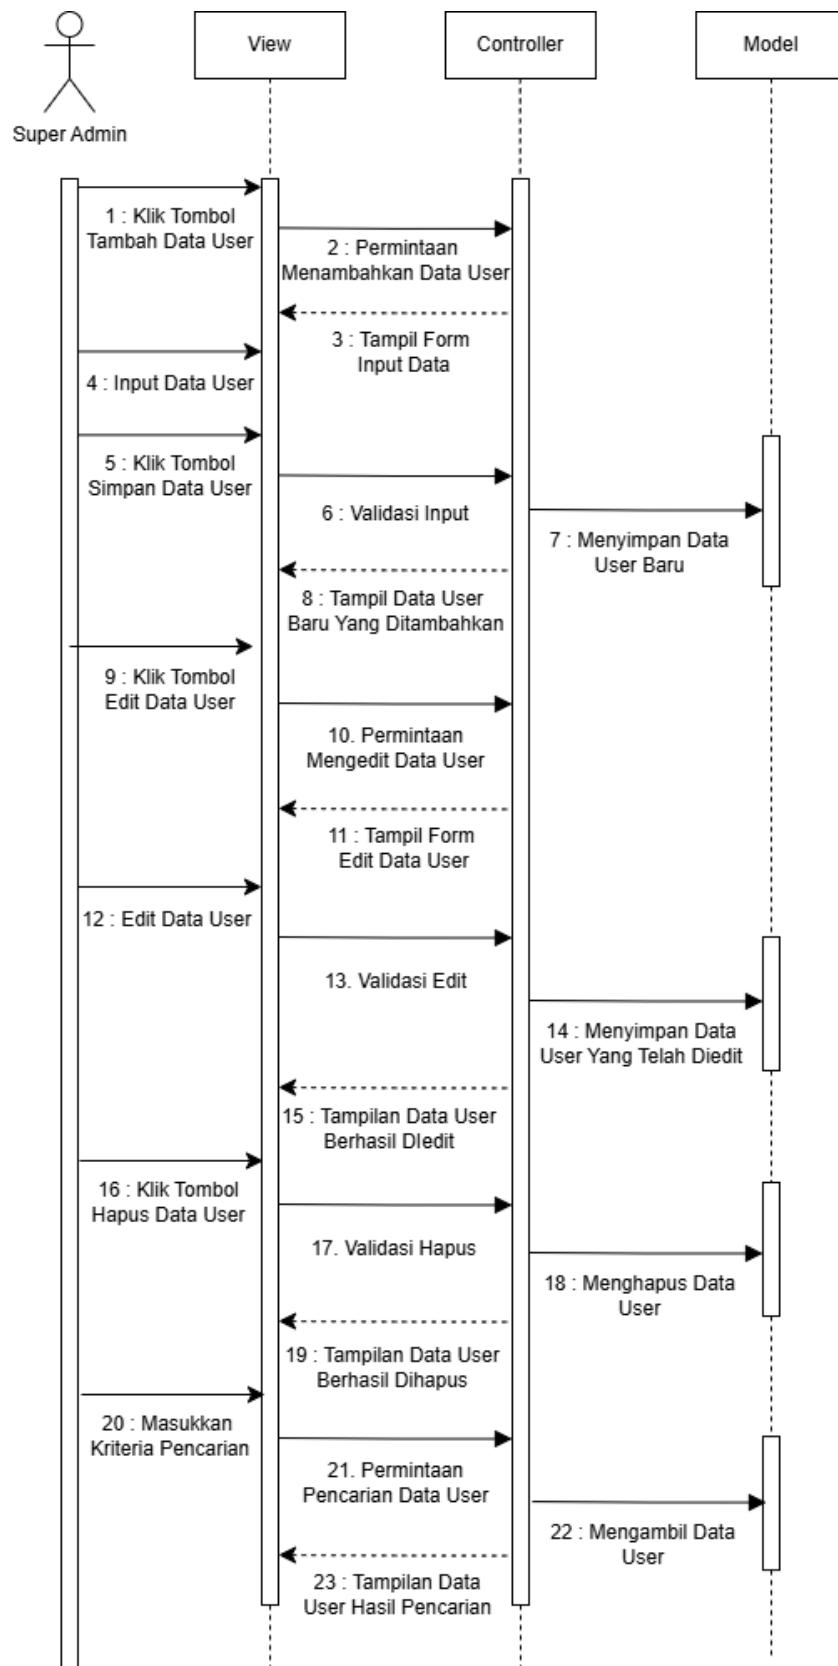

c. Sequence Diagram Login Pelanggan

Berikut gambaran rancangan sequence diagram login pelanggan pada perancangan sistem informasi e-commerce penjualan Pakaian

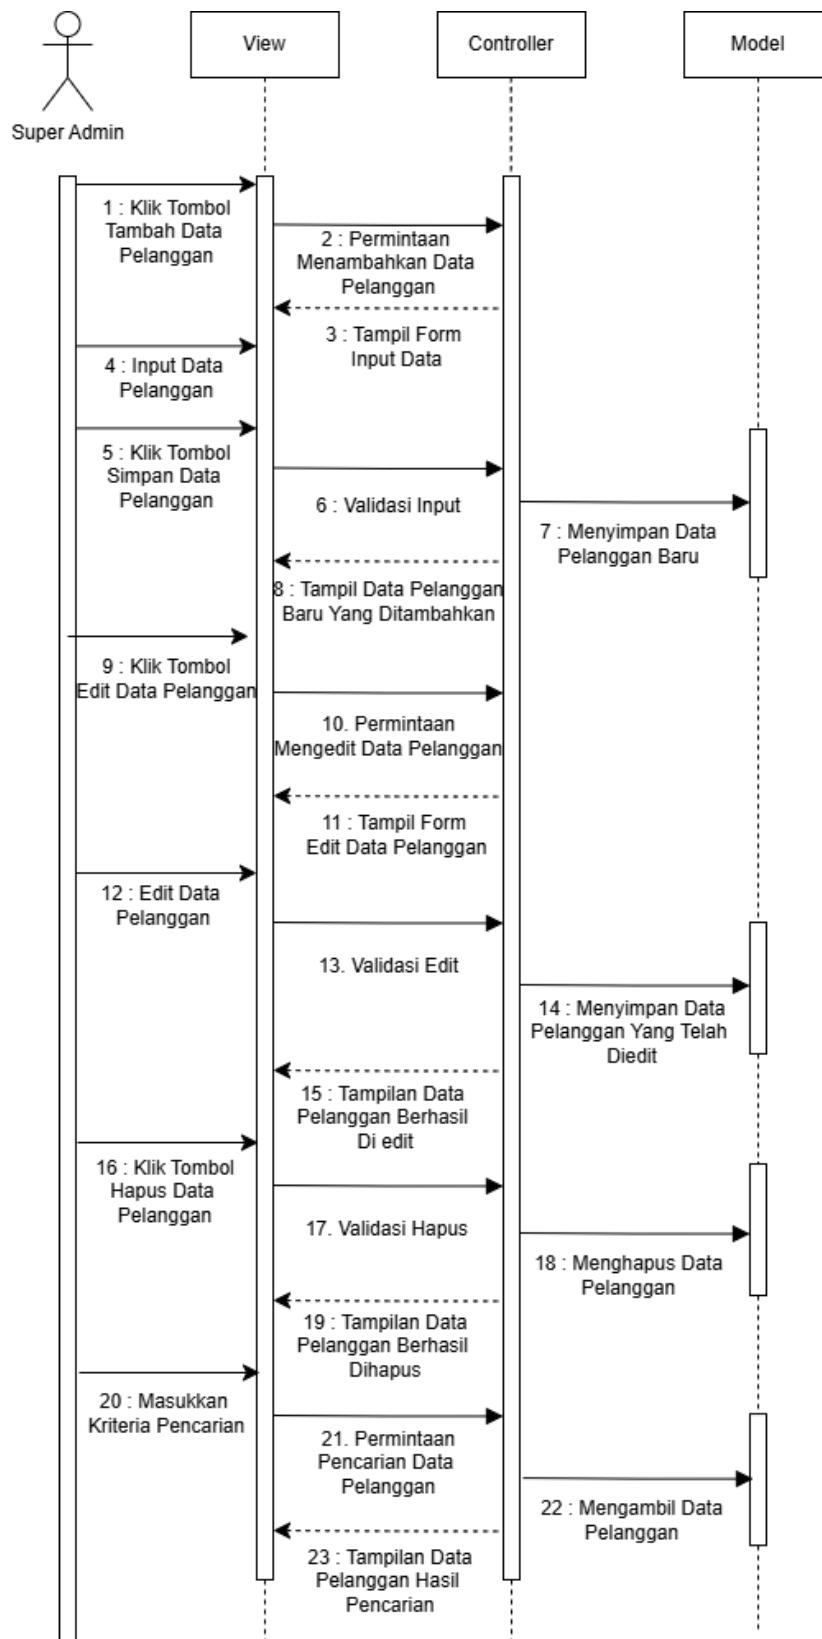

d. Sequence Diagram Mengelola Data User

Berikut gambaran rancangan sequence diagram mengelola data user pada perancangan sistem informasi e-commerce penjualan Pakaian

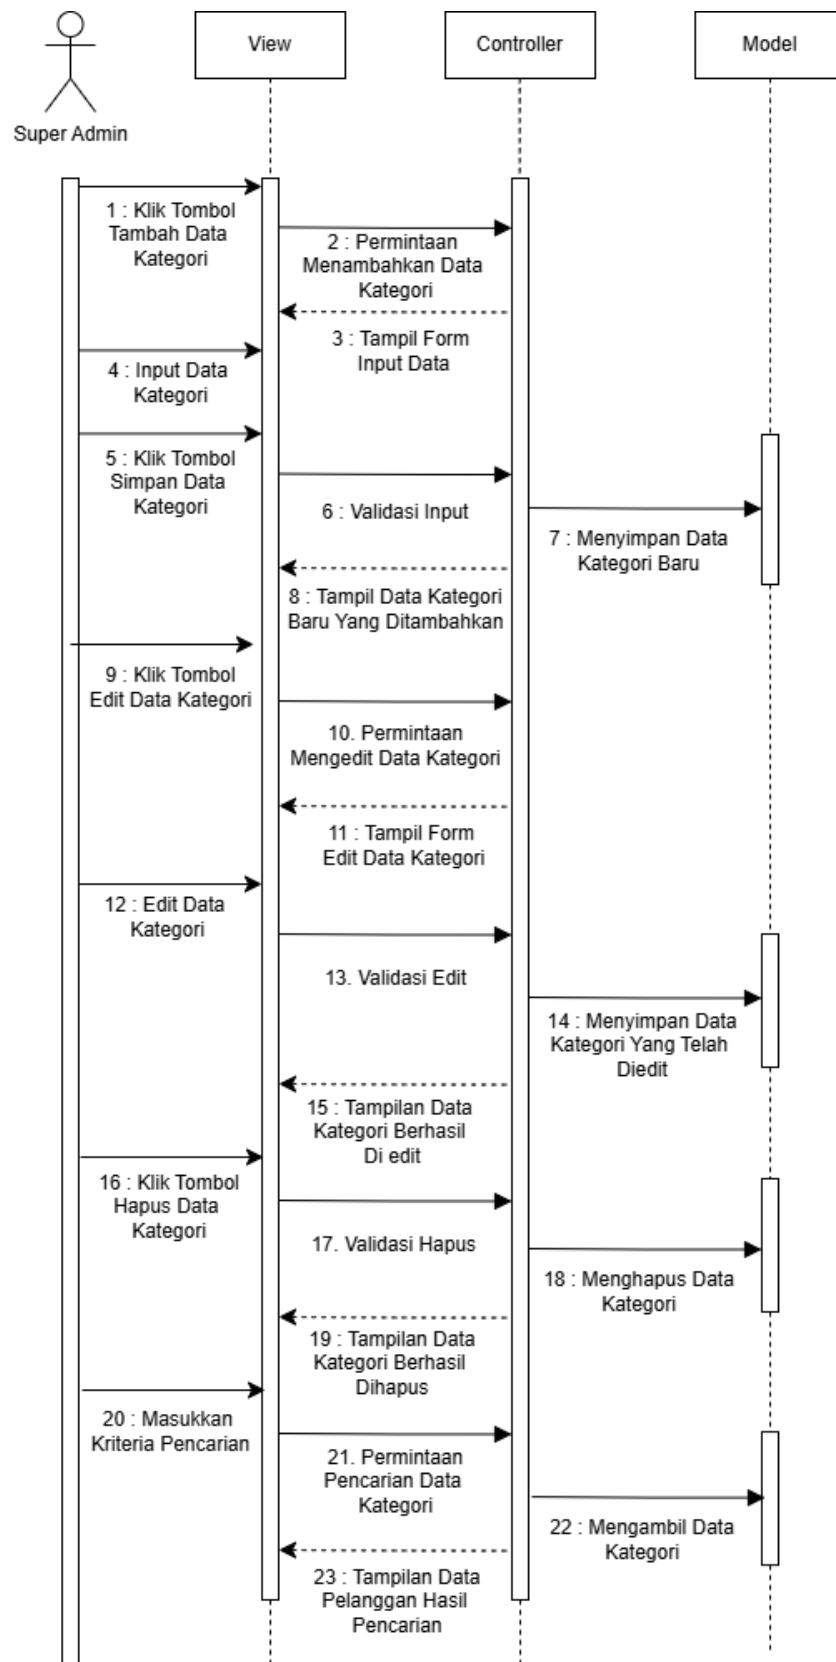

e. Sequence Diagram Mengelola Data Pelanggan

Berikut gambaran rancangan sequence diagram mengelola data pelanggan pada perancangan sistem informasi e-commerce penjualan Pakaian

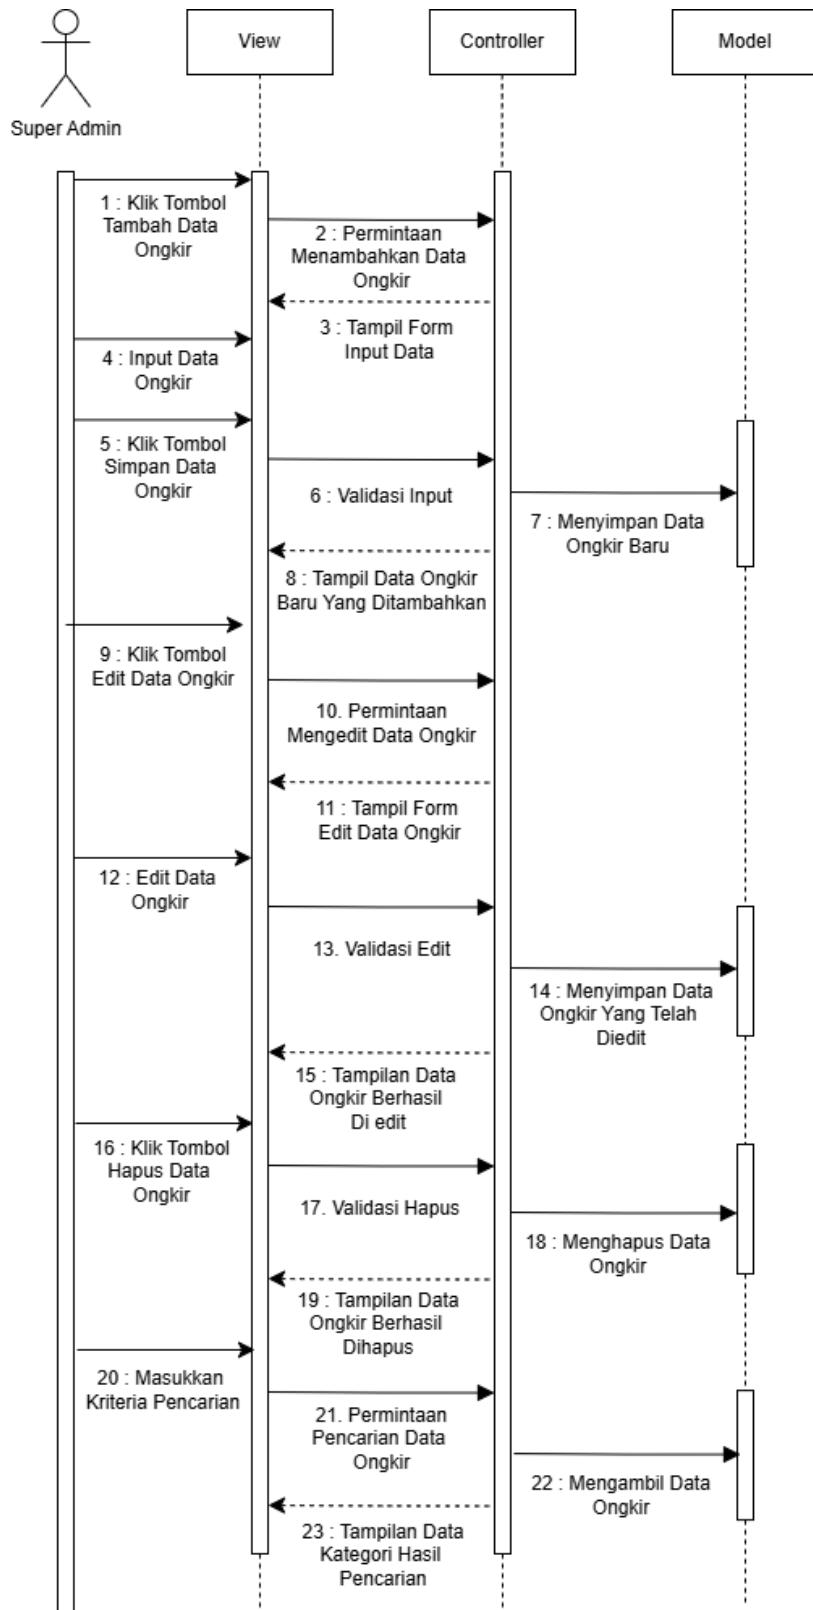

f. Sequence Diagram Mengelola Data Kategori

Berikut gambaran rancangan sequence diagram mengelola data kategori pada perancangan sistem informasi e-commerce penjualan Pakaian

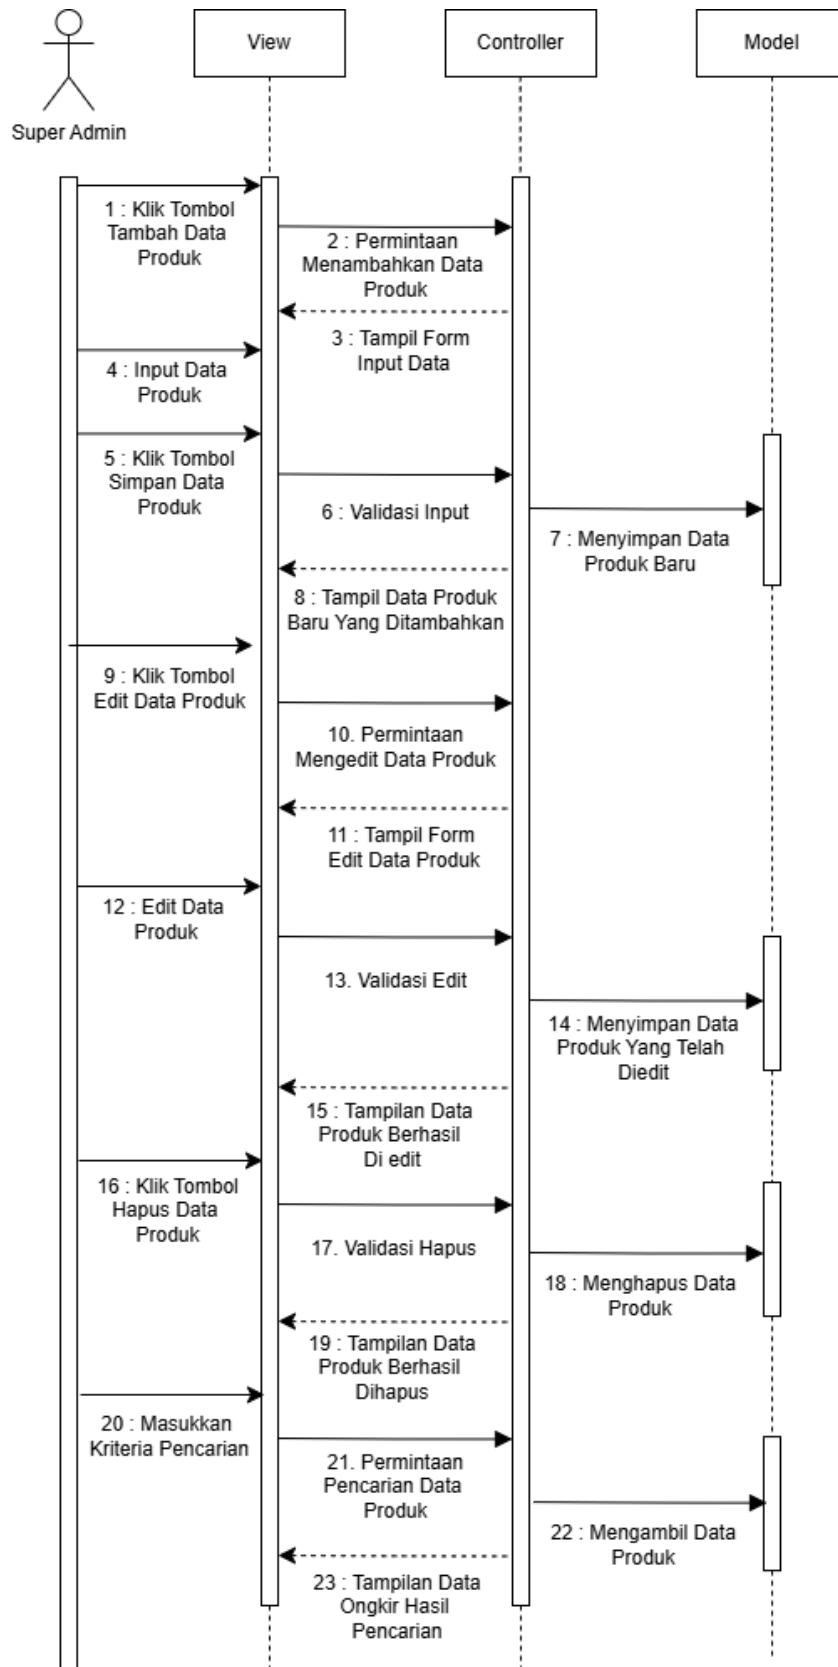

g. Sequence Diagram Mengelola Data Ongkir

Berikut gambaran rancangan sequence diagram mengelola data ongkir pada perancangan sistem informasi e-commerce penjualan Pakaian

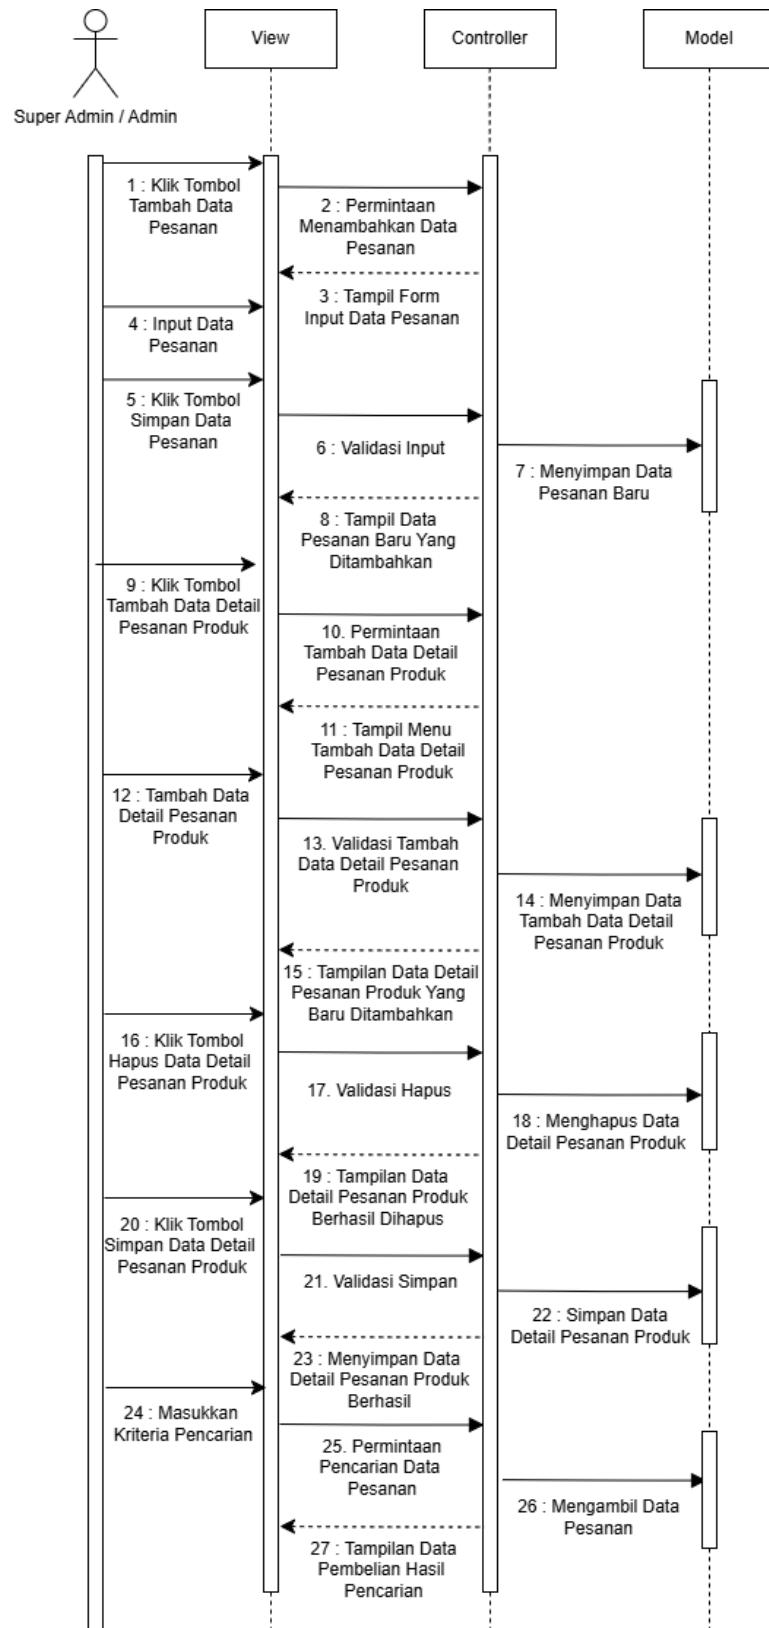

h. Sequence Diagram Mengelola Data Produk

Berikut gambaran rancangan sequence diagram mengelola data produk pada perancangan sistem informasi e-commerce penjualan Pakaian

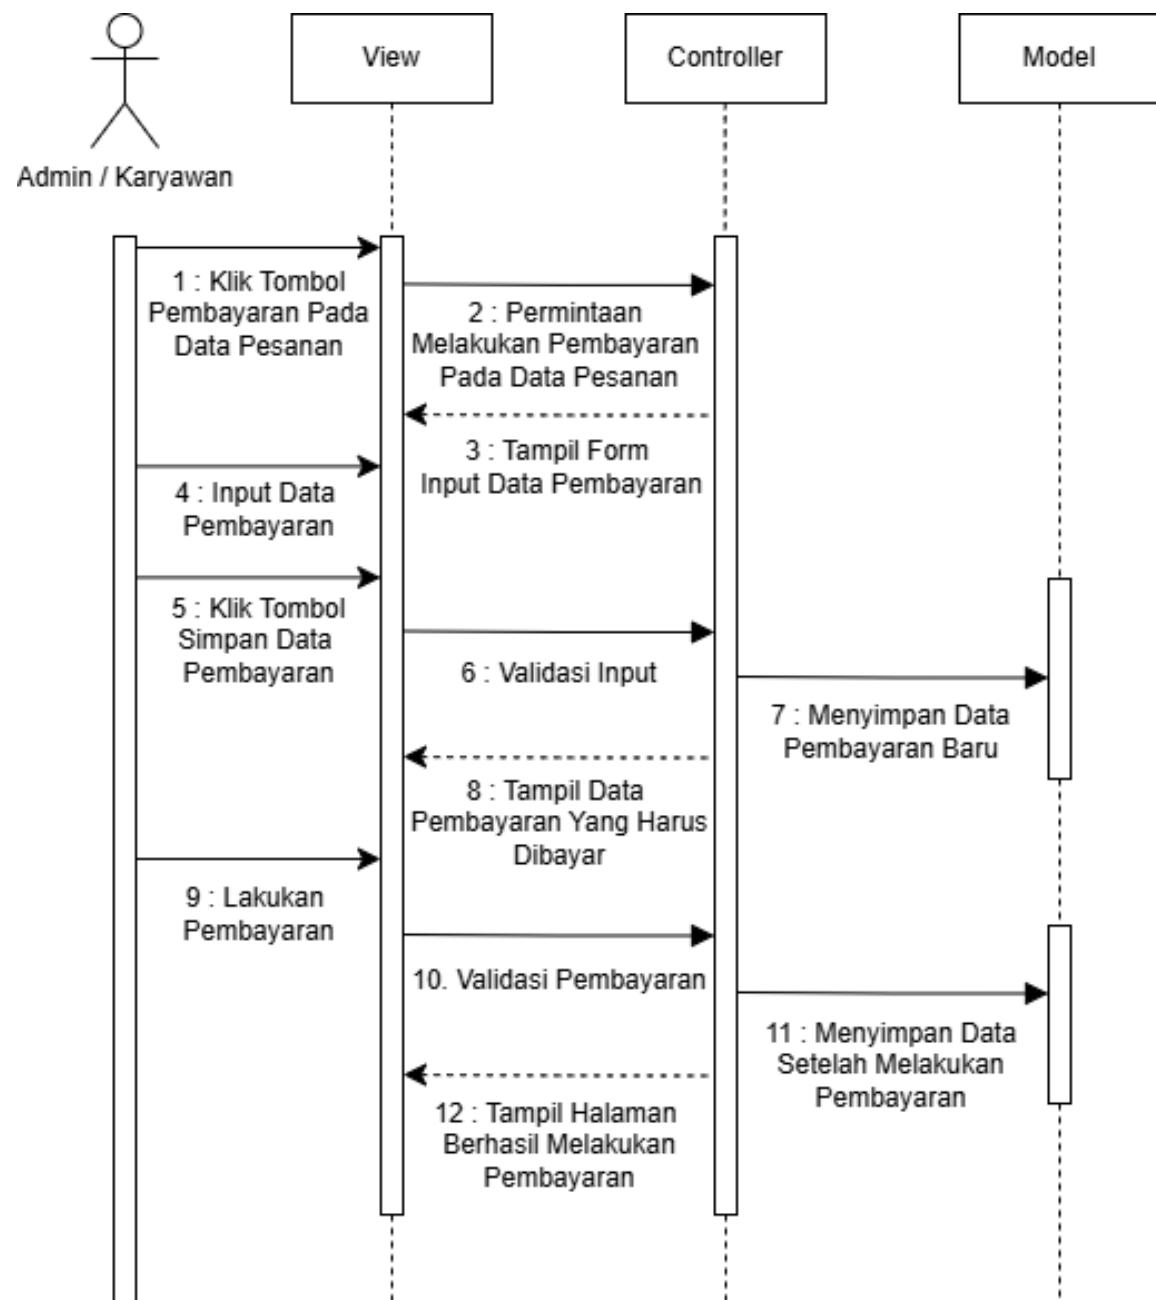

i. Sequence Diagram Mengelola Data Pesanan

Berikut gambaran rancangan sequence diagram mengelola data pesanan pada perancangan sistem informasi e-commerce penjualan Pakaian

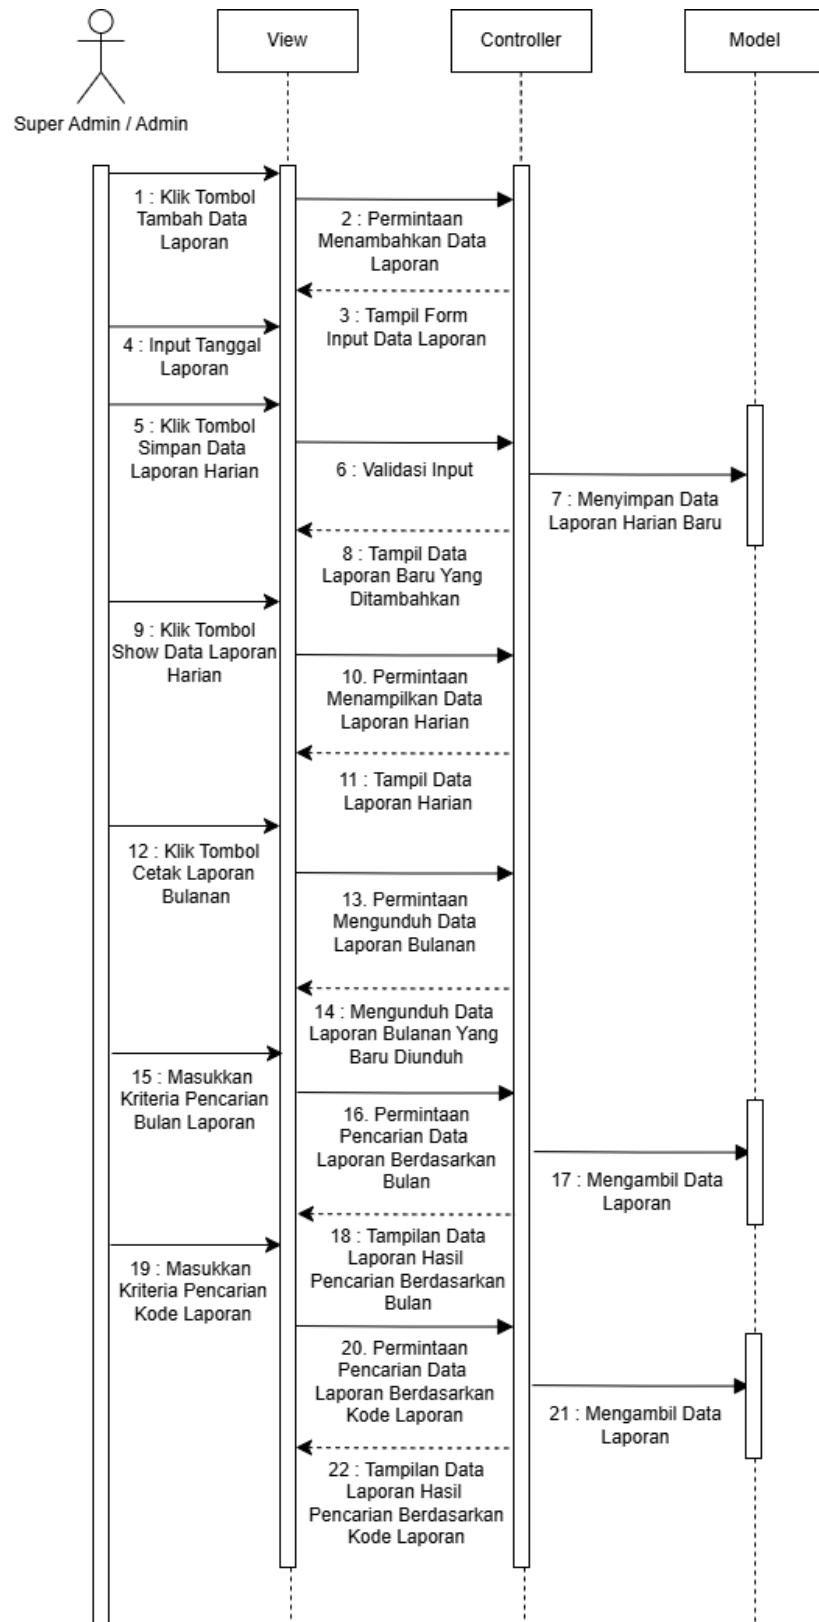

j. Sequence Diagram Mengelola Data Pembayaran

Berikut gambaran rancangan sequence diagram mengelola data pembayaran pada perancangan sistem informasi e-commerce penjualan Pakaian

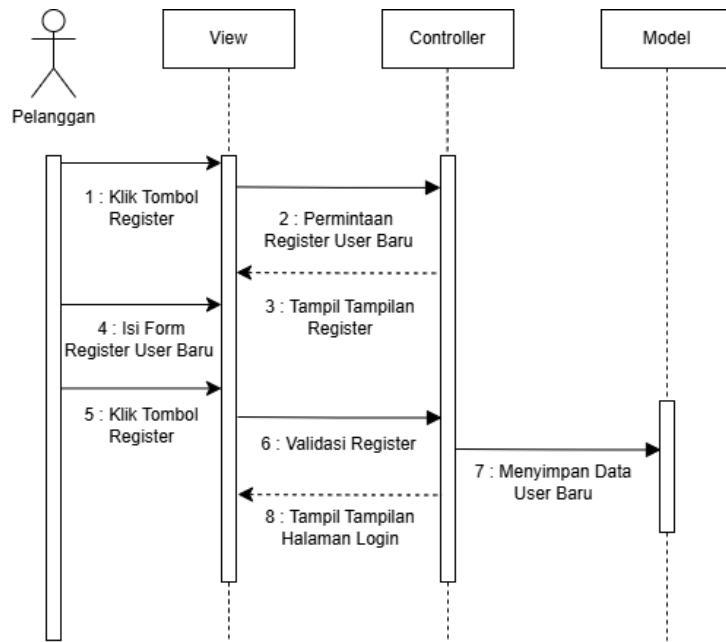

k. Sequence Diagram Mengelola Data Laporan

Berikut gambaran rancangan sequence diagram mengelola data laporan pada perancangan sistem informasi e-commerce penjualan Pakaian

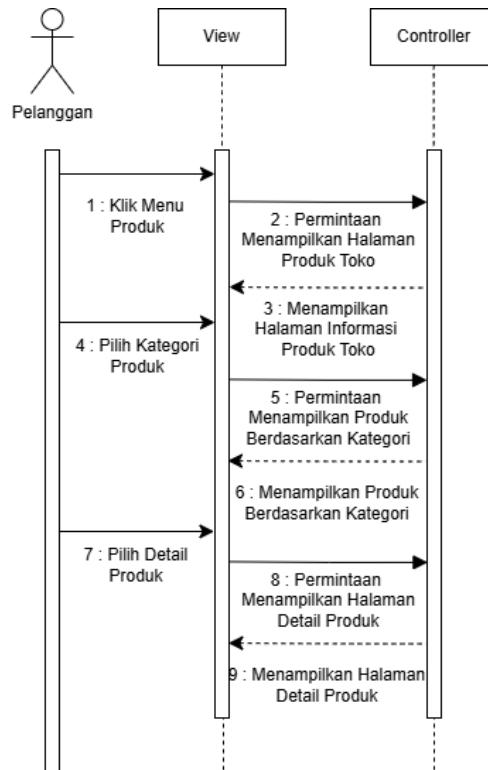

I. Sequence Diagram Register User / Pelanggan

Berikut gambaran rancangan sequence diagram register user / pelanggan pada perancangan sistem informasi e-commerce penjualan Pakaian

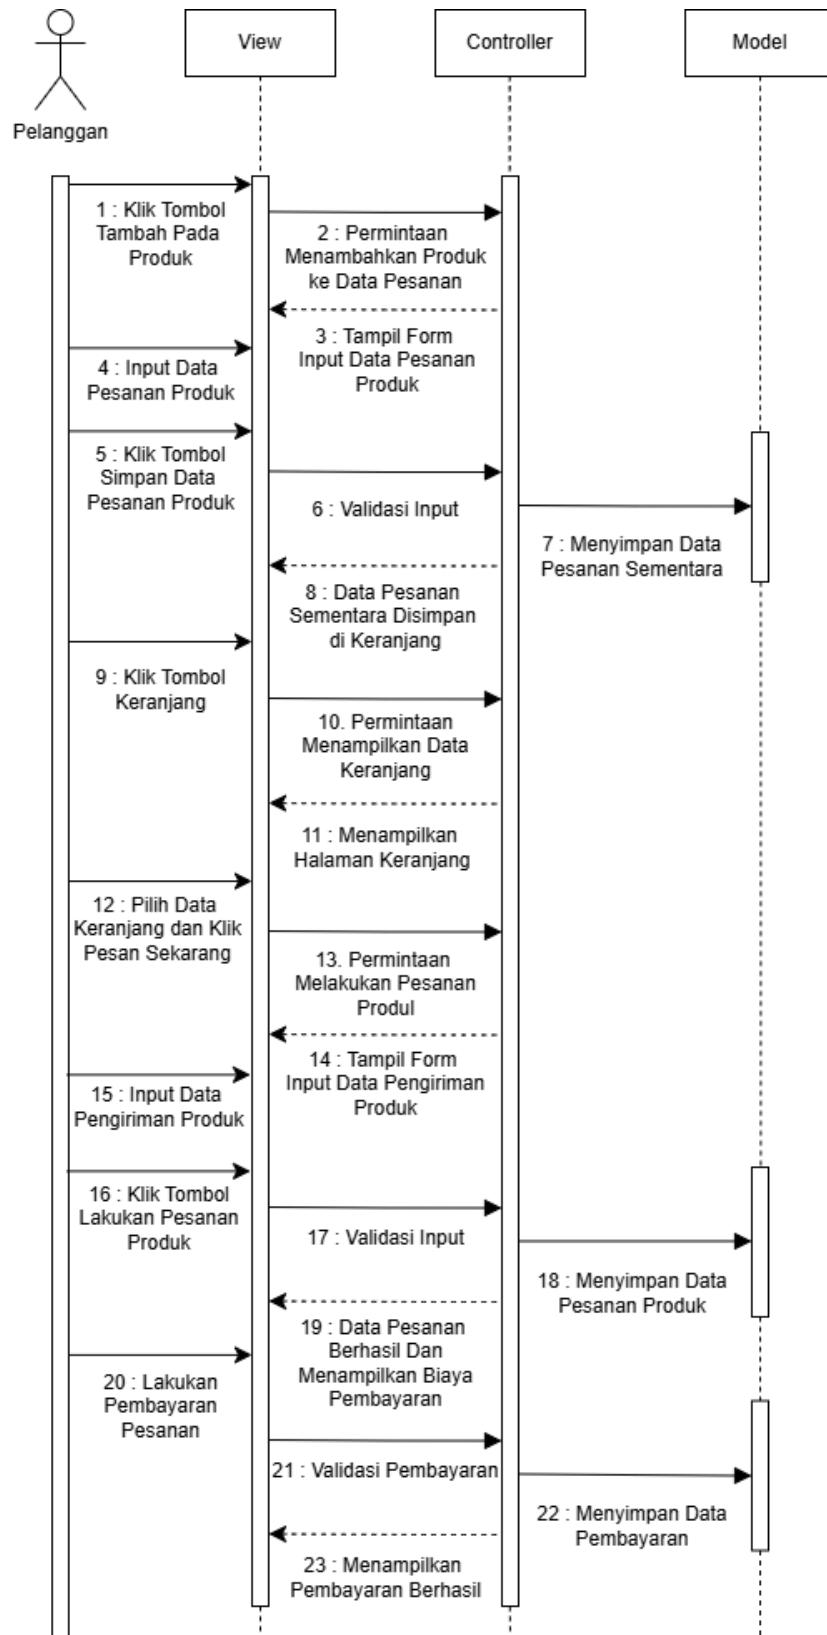

m. Sequence Diagram Melihat Informasi Produk

Berikut gambaran rancangan sequence diagram melihat informasi produk pada perancangan sistem informasi e-commerce penjualan Pakaian

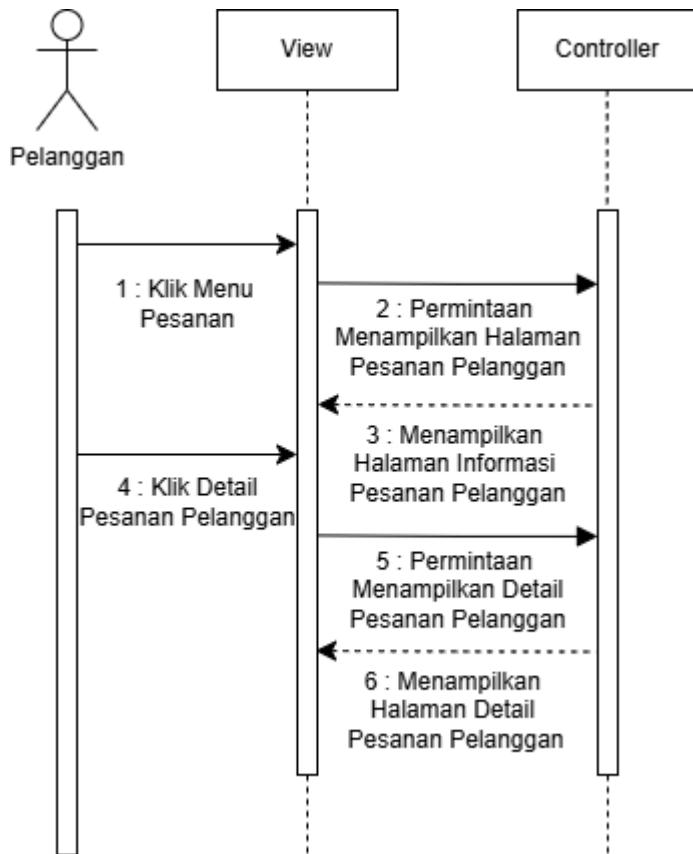

n. Sequence Diagram Melakukan Pemesanan Produk

Berikut gambaran rancangan sequence diagram melakukan pemesanan produk pada perancangan sistem informasi e-commerce penjualan Pakaian

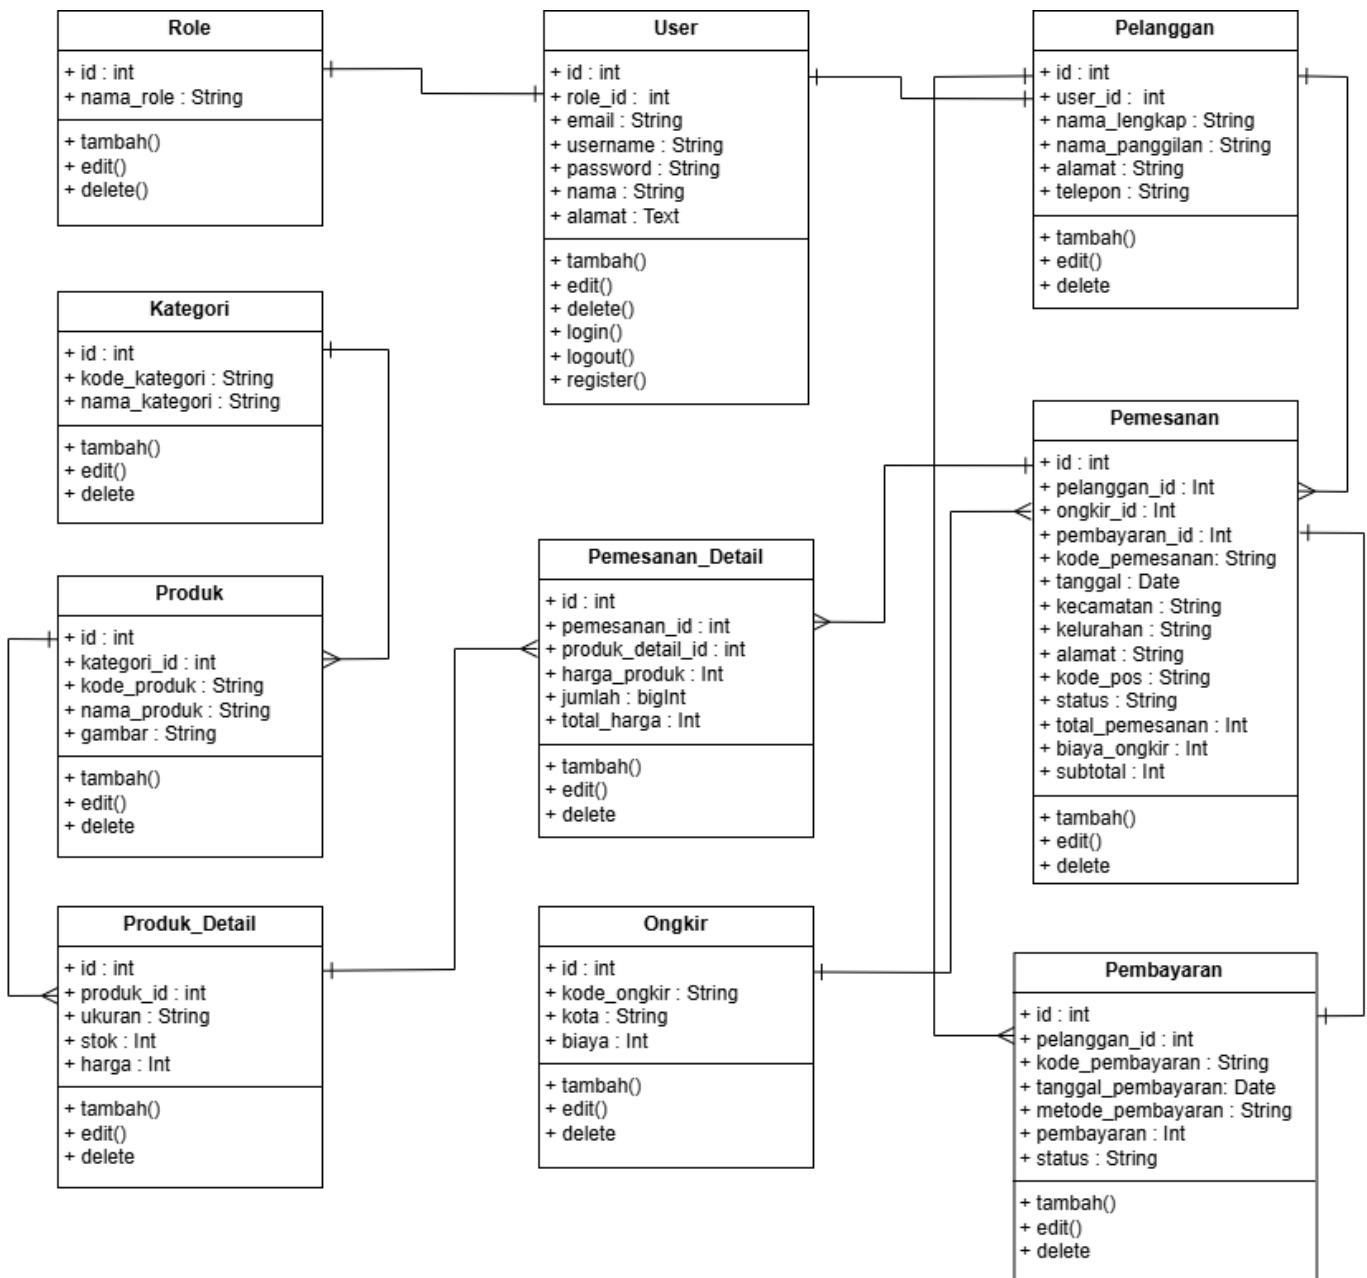

o. Sequence Diagram Melihat Informasi Pemesanan

Berikut gambaran rancangan sequence diagram melihat informasi pemesanan pada perancangan sistem informasi e-commerce penjualan Pakaian

F. Class Diagram

Class diagram adalah salah satu jenis diagram dalam Unified Modeling Language (UML) yang digunakan untuk menggambarkan struktur sistem dengan menunjukkan kelas-kelas, atribut, metode, dan hubungan antar objek dalam sistem. Diagram ini merupakan alat penting dalam pengembangan perangkat lunak berbasis objek karena memberikan gambaran yang jelas tentang bagaimana berbagai komponen sistem berinteraksi satu sama lain. Berikut gambaran rancangan class diagram pada perancangan sistem informasi e-commerce penjualan pakaian

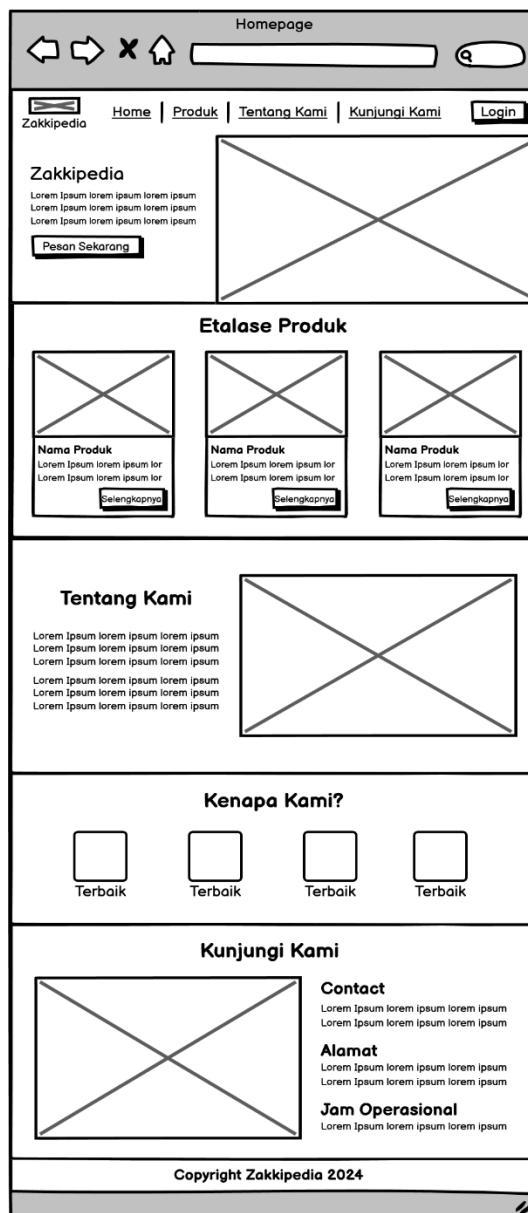

G. Rancangan UI/UX Sistem

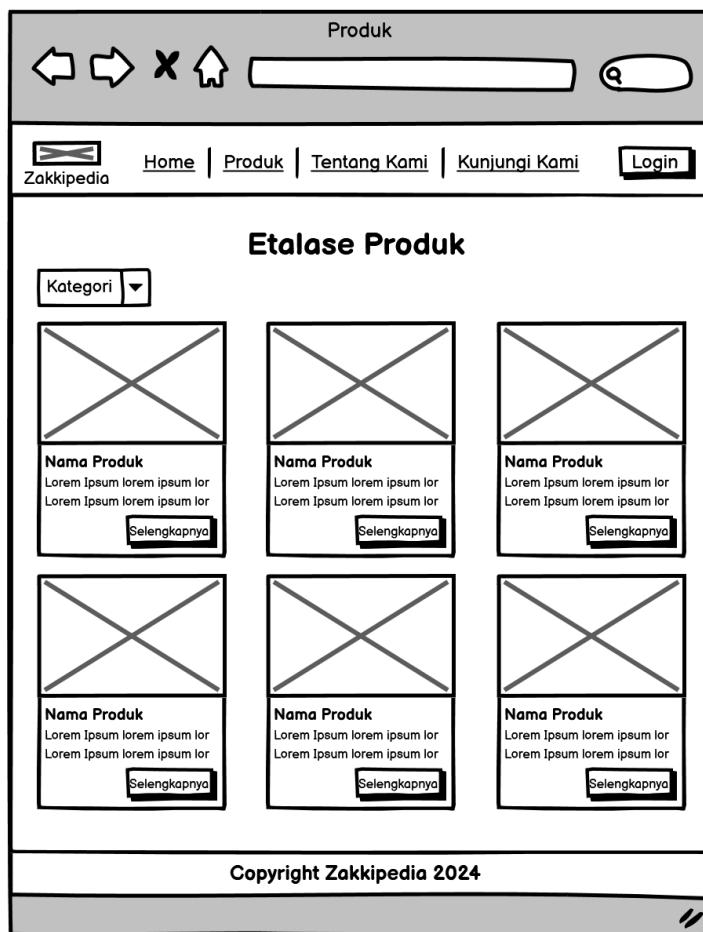

Rancangan UI/UX sistem informasi yang efektif harus mengutamakan prinsip User Centered Design (UCD) yang melibatkan pemahaman mendalam tentang kebutuhan dan kebiasaan pengguna. Proses perancangan ini mencakup beberapa tahapan, seperti memahami konteks penggunaan, menentukan kebutuhan pengguna, menghasilkan solusi desain, dan melakukan penilaian terhadap desain yang dihasilkan. Dengan menggunakan alat seperti Balsamiq, pengembang dapat membuat prototipe yang tidak hanya menarik secara visual tetapi juga fungsional, sehingga dapat meningkatkan pengalaman pengguna secara keseluruhan. Berikut beberapa rancangan UI/UX perancangan sistem e-commerce penjualan pakaian

A. Guest

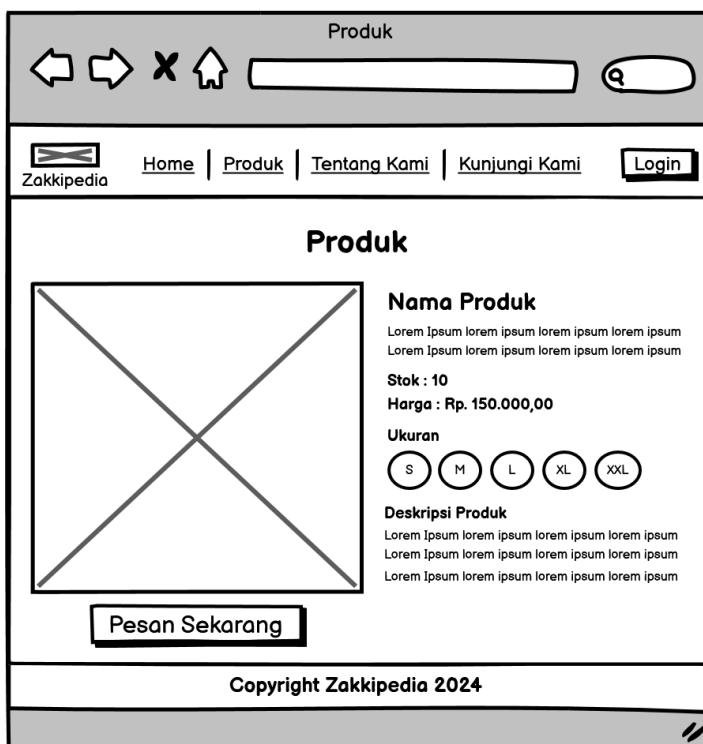

a. Halaman Homepage

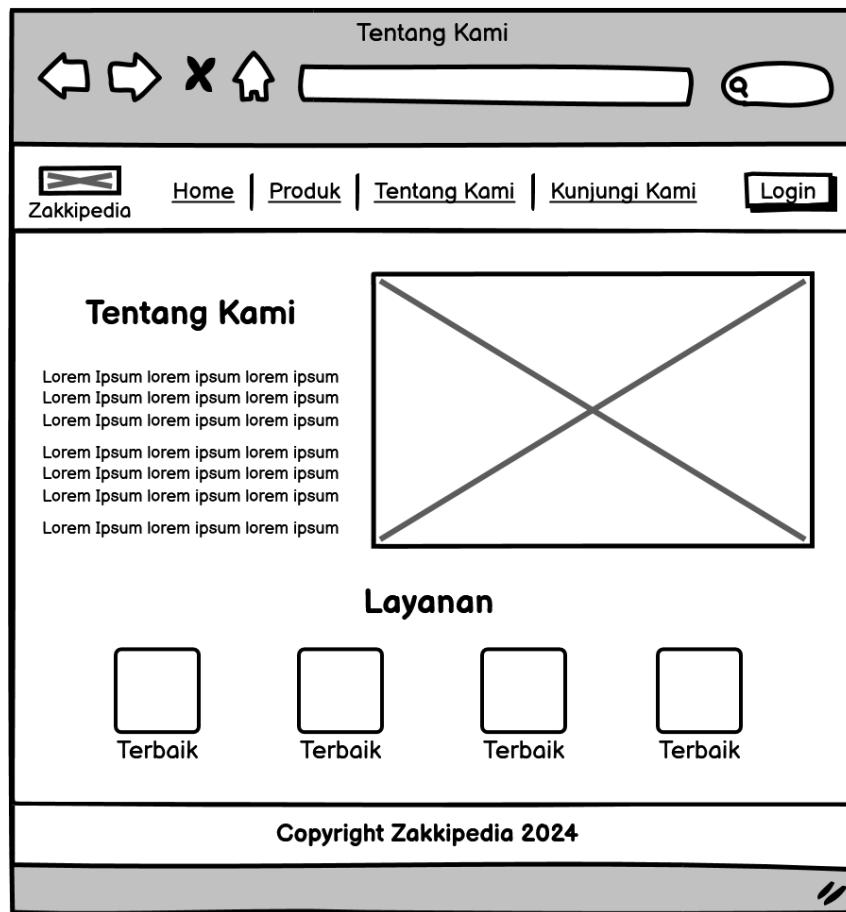

b. Halaman Produk

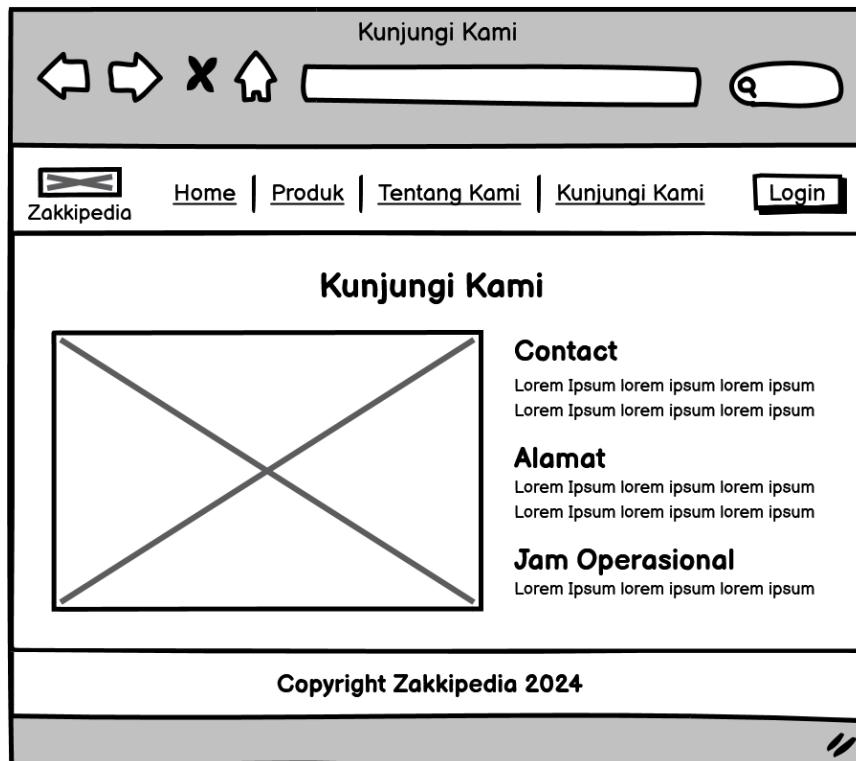

c. Halaman Selengkapnya Produk

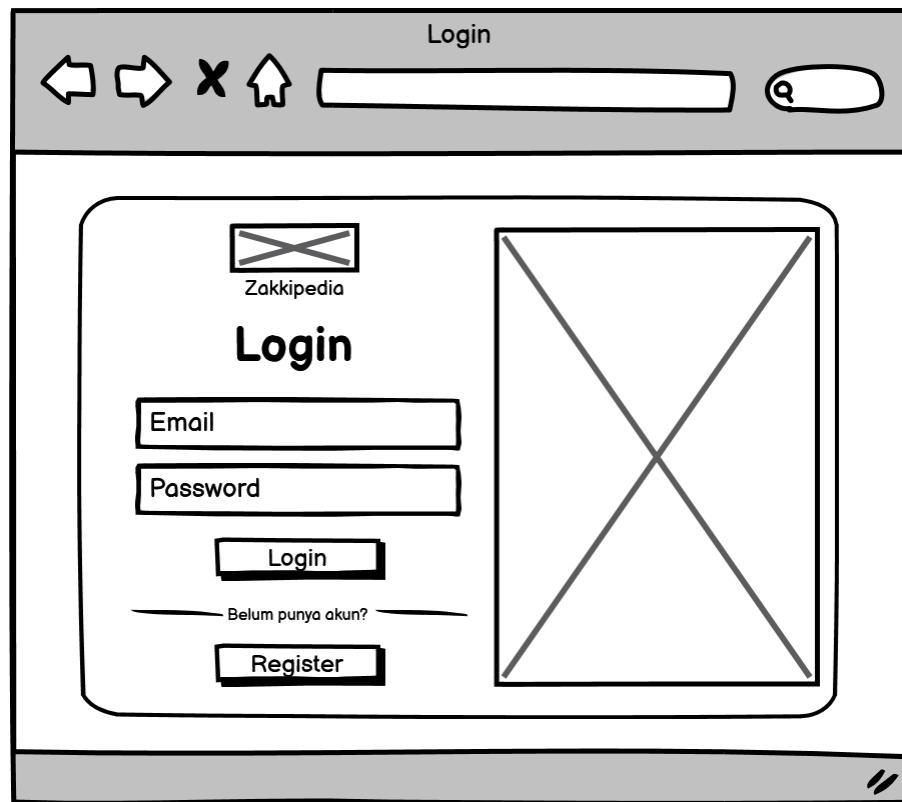

d. Halaman Tentang Kami

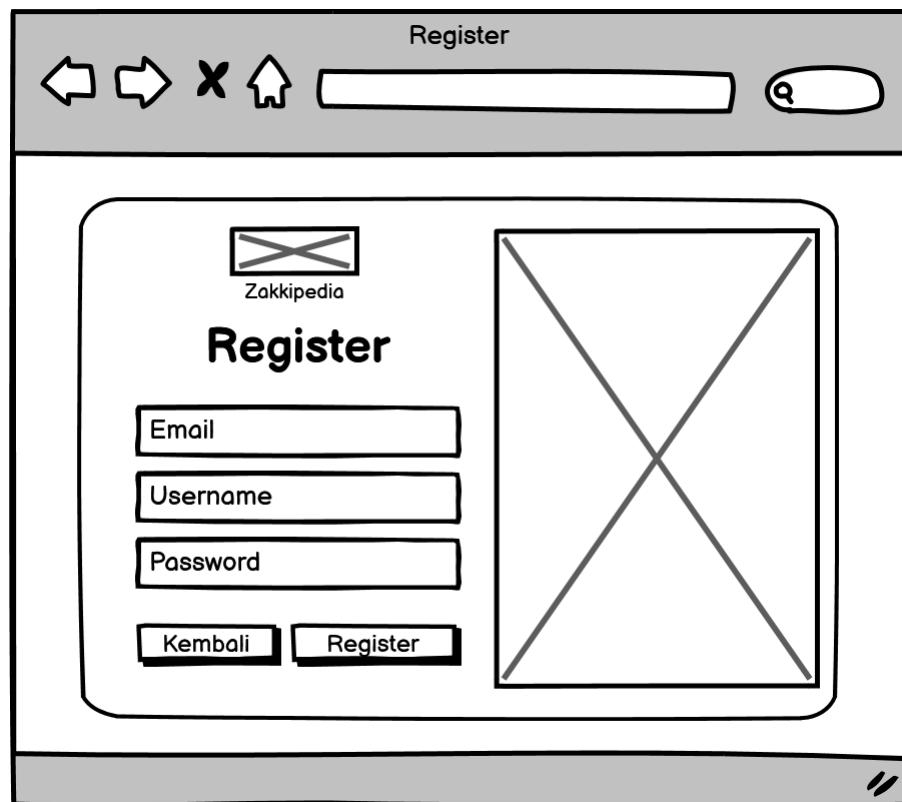

e. Halaman Kunjungi Kami

f. Halaman Login

g. Halaman Register

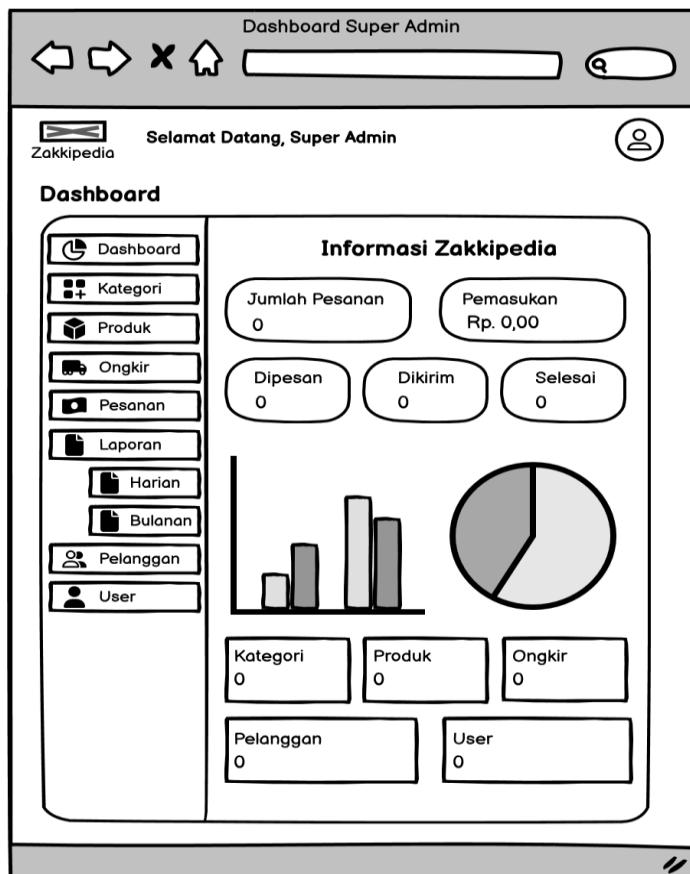

h. Halaman Lengkapi Akun

The wireframe shows a header with navigation icons (back, forward, search) and a title 'Lengkapi Akun'. Below the header is a logo for 'Zakkipedia' and a section titled 'Lengkapi Akun' containing several input fields: 'Nama Lengkap' and 'Nama Panggilan'; 'Provinsi' and 'Kota' both with validation 'V'; 'Kecamatan' and 'Kelurahan' both with validation 'V'; 'Jalan'; 'No Telepon'; and a 'Simpan' button. To the right of the form is a large area with a large 'X' mark.

B. Super Admin

a. Dashboard Super Admin

b. Halaman Menu Kategori

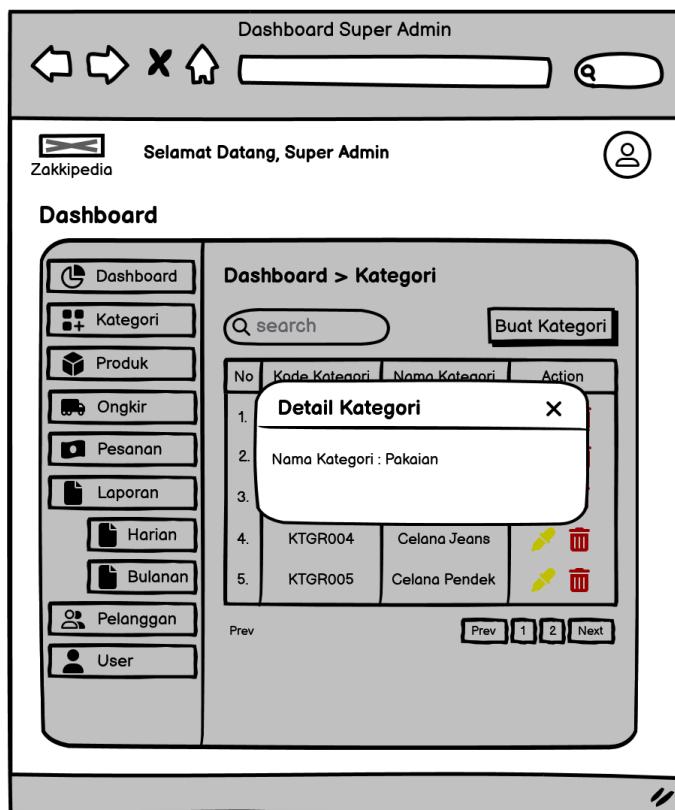

1. Halaman Index Menu Kategori

The wireframe shows a mobile-style dashboard for a super administrator. At the top, there's a header with navigation icons (back, forward, search) and a welcome message "Selamat Datang, Super Admin" from "Zakkipedia". Below the header is a user profile icon. The main area is titled "Dashboard" and contains a sidebar with various menu items: Dashboard, Kategori, Produk, Ongkir, Pesanan, Laporan, Harian, Bulanan, Pelanggan, and User. To the right of the sidebar is a table titled "Dashboard > Kategori". The table has columns for No, Kode Kategori, Nama Kategori, and Action. It lists five categories: KTGR001 (Baju Kemeja), KTGR002 (Baju Kaos), KTGR003 (Hodie), KTGR004 (Celana Jeans), and KTGR005 (Celana Pendek). Each row in the table includes edit and delete icons. Below the table, it says "1-5 ditampilkan" and has navigation buttons for Prev, 1, 2, Next.

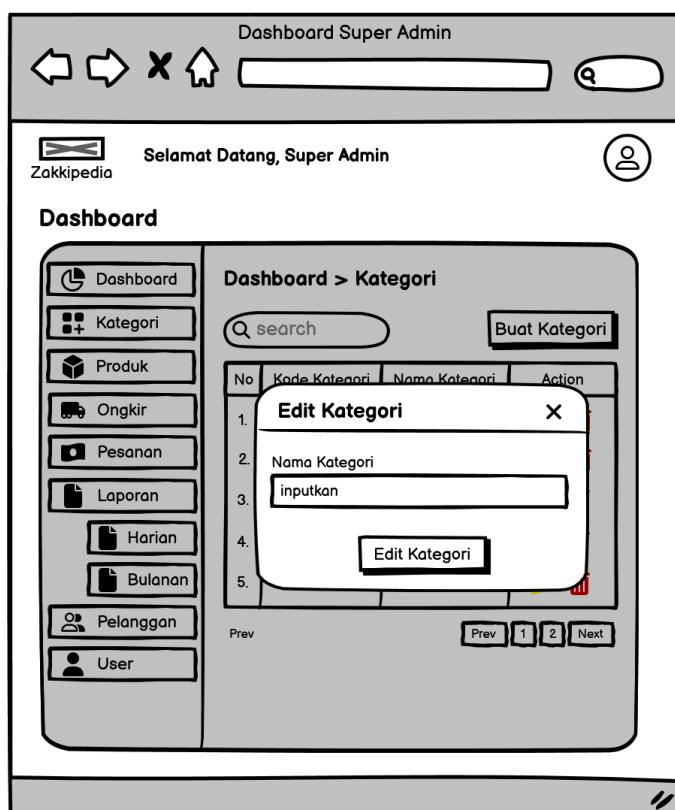

2. Halaman Buat Kategori

The wireframe shows the same mobile-style dashboard as above, but the main content area is focused on creating a new category. A modal window titled "Buat Kategori" is open. It has a close button "X". Step 1 asks for "Nama Kategori" with an input field containing "inputkan". Step 2 is labeled "4.". Step 3 is labeled "5.". Step 4 contains a button "Buat Kategori Baru". Below the modal, it says "Prev" and "1 2 Next".

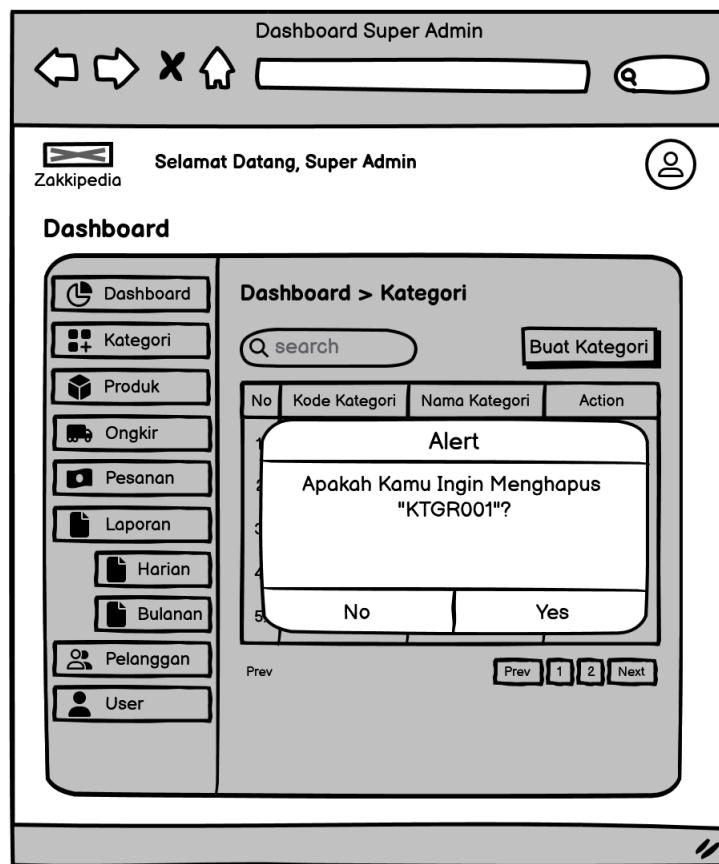

3. Halaman Show Kategori

4. Halaman Edit Kategori

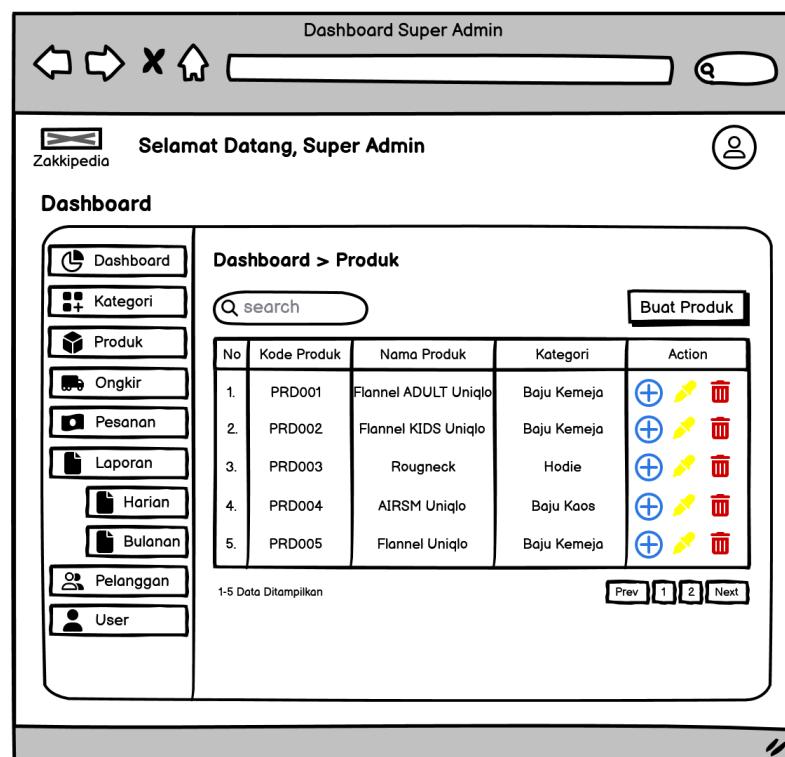

5. Halaman Hapus Kategori

c. Halaman Menu Produk

4. Halaman Hapus Produk

5. Halaman Index Detail Produk

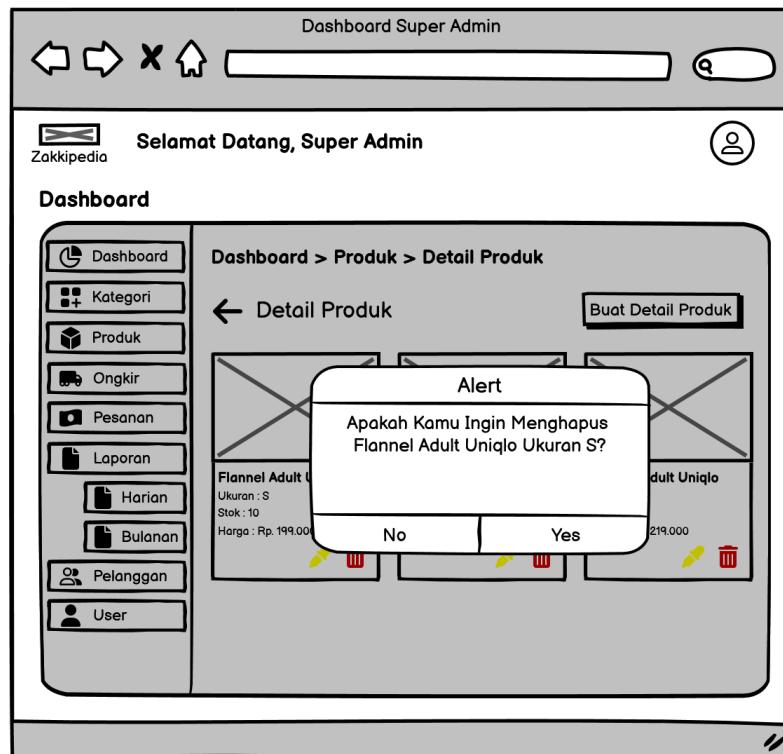

6. Halaman Buat Detail Produk

The screenshot shows a mobile application interface for creating a product detail. At the top, there's a header bar with navigation icons (back, forward, search, etc.) and a title 'Dashboard Super Admin'. Below this is a banner with the text 'Selamat Datang, Super Admin' and a user profile icon. The main area is titled 'Dashboard > Produk > Detail > Buat Detail Produk'. On the left, a sidebar labeled 'Dashboard' contains links for Dashboard, Kategori, Produk, Ongkir, Pesanan, Laporan, Pelanggan, and User. The right side contains two input fields: 'Nama Produk' (set to 'Disabled') and 'Ukuran' (set to 'pilih'), followed by 'Stok' (set to 'Inputan') and 'Harga' (set to 'Inputan'). A large button at the bottom right says 'Buat Detail Produk'.

7. Halaman Edit Detail Produk

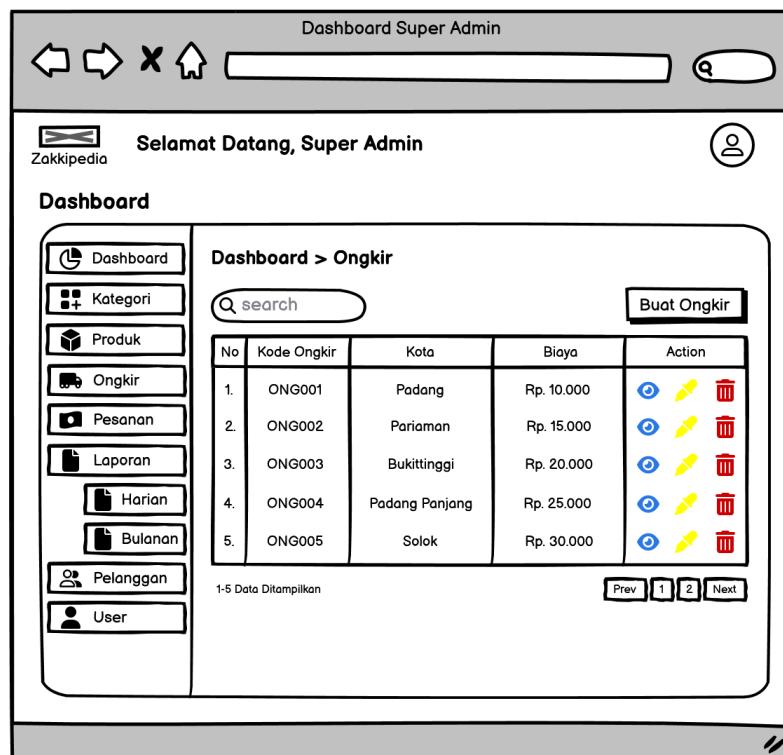

The screenshot shows a mobile application interface for editing a product detail. The layout is identical to the 'Buat Detail Produk' page, with a header bar, 'Selamat Datang, Super Admin' banner, and a sidebar on the left. The main title is 'Dashboard > Produk > Detail > Edit Detail Produk'. The right side features the same four input fields: 'Nama Produk' (set to 'Disabled'), 'Ukuran' (set to 'pilih'), 'Stok' (set to 'Inputan'), and 'Harga' (set to 'Inputan'). A large button at the bottom right says 'Edit Detail Produk'.

8. Halaman Hapus Detail Produk

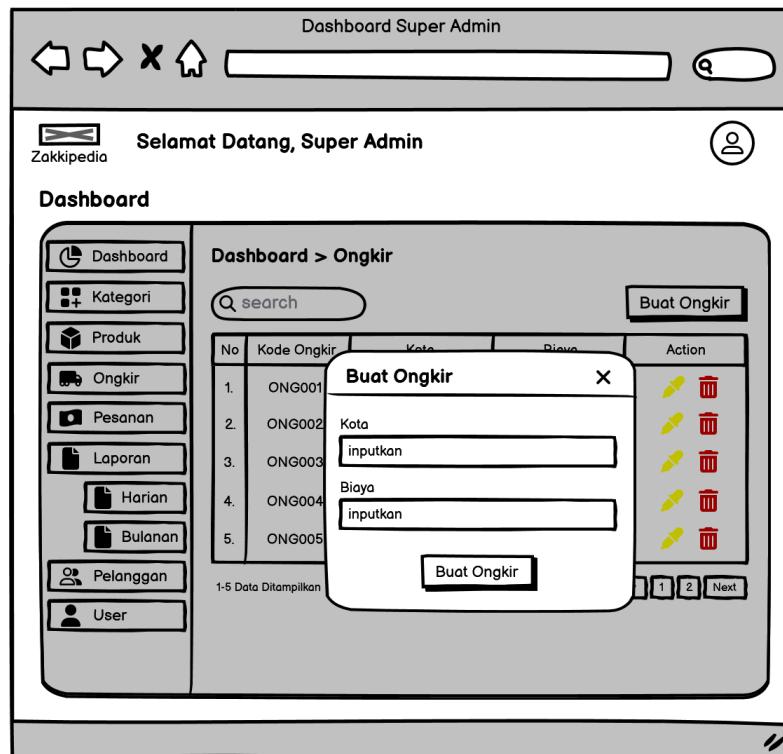

d. Halaman Menu Ongkir

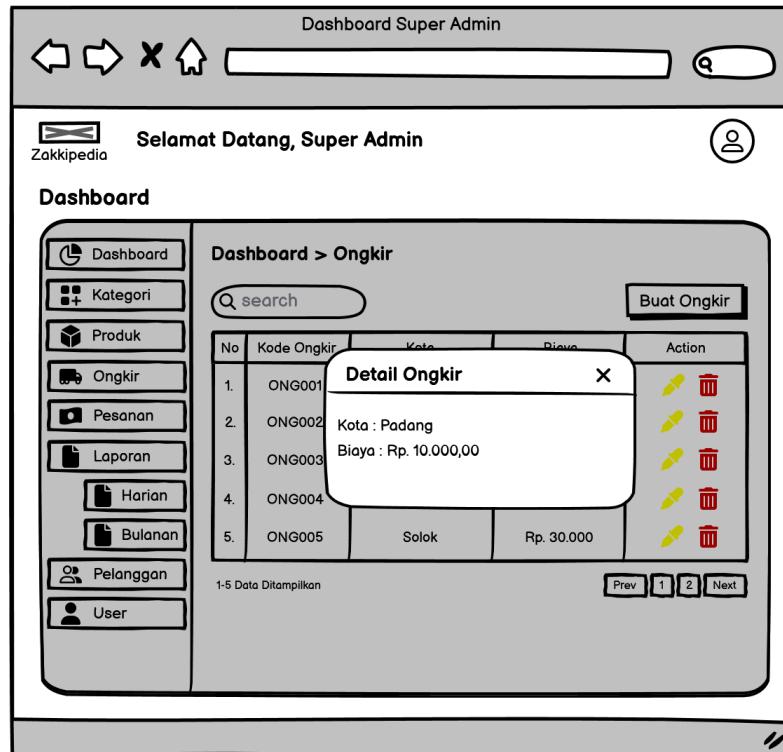

1. Halaman Index Ongkir

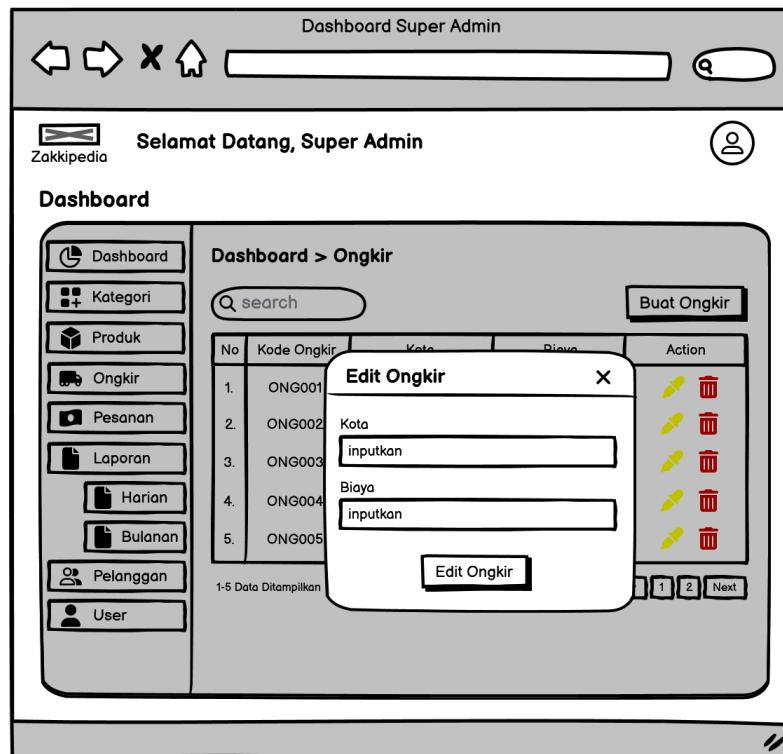

2. Halaman Buat Ongkir

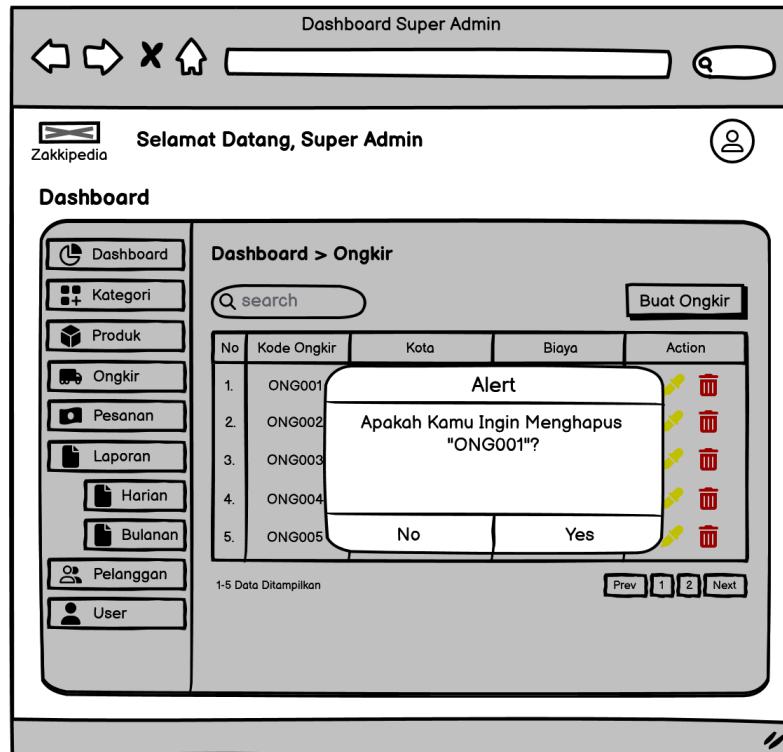

3. Halaman Show Ongkir

4. Halaman Edit Ongkir

5. Halaman Hapus Ongkir

e. Halaman Menu Pesanan

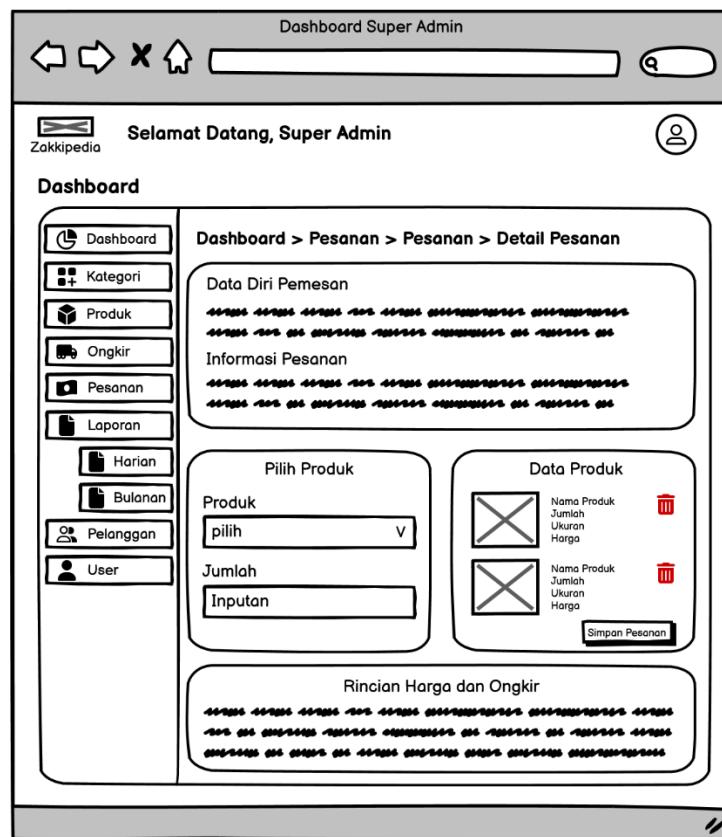

1. Halaman Index Pesanan

The screenshot shows a web-based dashboard for a super administrator. At the top, there's a header with navigation icons (back, forward, search, etc.) and a welcome message "Selamat Datang, Super Admin" from Zakkipedia. Below the header is a sidebar titled "Dashboard" containing links for Dashboard, Kategori, Produk, Ongkir, Pesanan, Laporan, Harian, Bulanan, Pelanggan, and User. The main content area is titled "Dashboard > Pesanan". It features a search bar and a "Buat Pesanan" button. A table lists five orders (PSN001 to PSN005) with columns for Order Number, Product Name, Status, and Action (Edit and Delete). The status column shows "Dikirim" for most orders. At the bottom, it says "1-5 Data Ditampilkan" and has navigation buttons for Prev, 1, 2, Next.

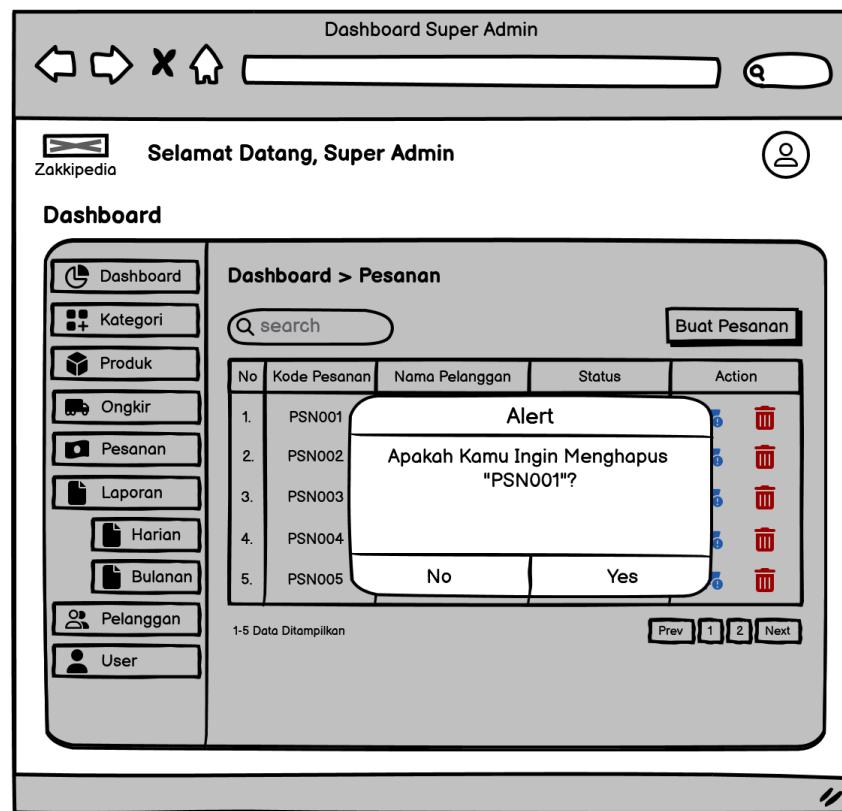

2. Halaman Buat Pesanan

This screenshot shows the "Buat Pesanan" (Create Order) page. The left sidebar is identical to the previous screenshot. The main content area is titled "Dashboard > Pesanan > Buat Pesanan". It includes a back arrow, a "Buat User Baru" button, and several input fields for creating a new order. The fields are grouped into two columns: "Pelanggan" (Customer) and "Daerah Kirim" (Delivery Area), each with dropdown menus for selecting "pilih". There are also fields for "Kecamatan" (District), "Kelurahan" (Village), "Jalan" (Street), and "Kode Pos" (Postal Code). At the bottom is a large "Buat Pesanan Baru" (Create New Order) button.

3. Halaman Detail Pesanan

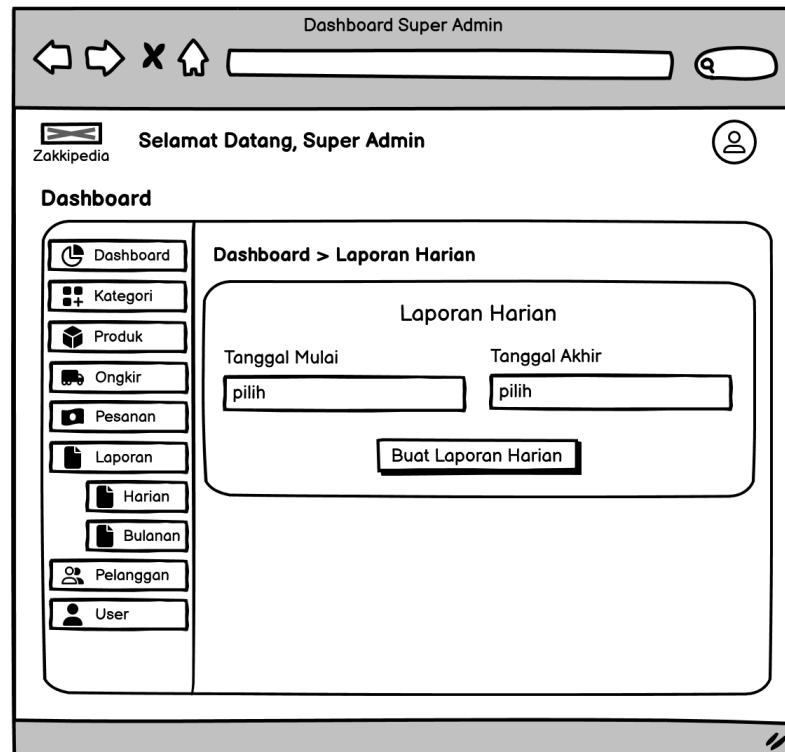

4. Halaman Hapus Pesanan

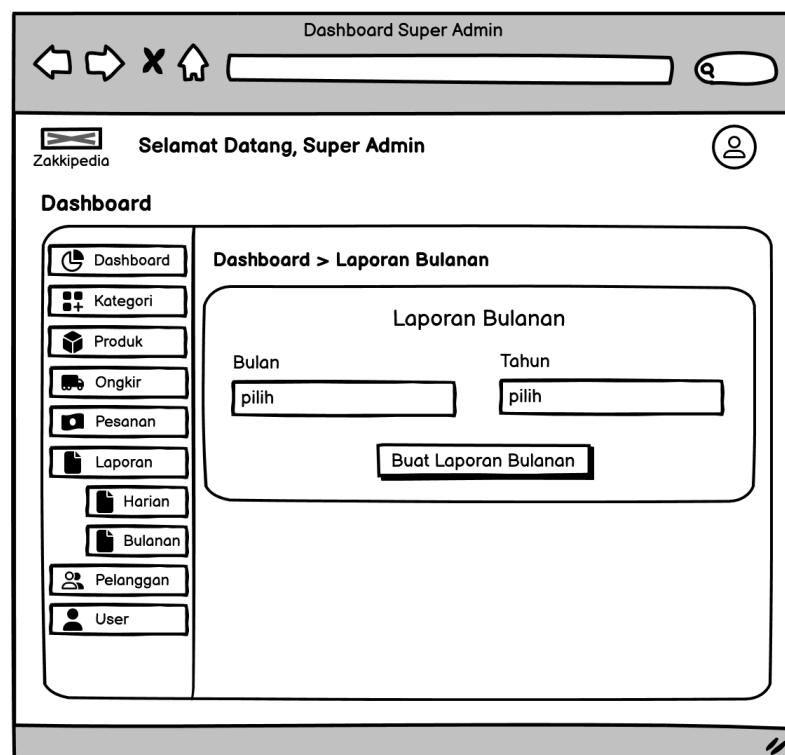

f. Halaman Menu Laporan

1. Index Laporan Harian

2. Index Laporan Bulanan

g. Halaman Menu Pelanggan

1. Halaman Index Pelanggan

The screenshot shows a web-based dashboard titled 'Dashboard Super Admin'. At the top, there are navigation icons (back, forward, search, etc.) and a user profile icon. Below the title, it says 'Selamat Datang, Super Admin' and 'Zakkipedia'. The main area is titled 'Dashboard' and contains a sidebar with links: Dashboard, Kategori, Produk, Ongkir, Pesanan, Laporan, Harian, Bulanan, Pelanggan, and User. To the right, under 'Dashboard > Pelanggan', there is a search bar and a table listing 5 data entries. The table columns are No, Email, Nama, Alamat, and Action. The data is as follows:

No	Email	Nama	Alamat	Action
1.	pelanggan@gmail.com	pelanggan	Padang	
2.	pelanggan2@gmail.com	pelanggan	Padang	
3.	pelanggan3@gmail.com	pelanggan	Padang	
4.	pelanggan4@gmail.com	pelanggan	Padang	
5.	pelanggan5@gmail.com	pelanggan	Padang	

Below the table, it says '1-5 Data Ditampilkan' and has navigation buttons for Prev, 1, 2, Next, and a refresh icon.

2. Halaman Buat Pelanggan

The screenshot shows the same 'Dashboard Super Admin' interface. In the sidebar, 'User' is selected. On the right, under 'Dashboard > User > Buat Pelanggan', there is a form titled 'Buat Pelanggan Baru'. The form has two columns of input fields:

User	Nama Lengkap
enable	inputkan
Telepon	Nama Panggilan
inputkan	inputkan
Provinsi	Kota
pilih	pilih
Kecamatan	Kelurahan
pilih	pilih

At the bottom of the form is a large blue button labeled 'Buat Pelanggan Baru'.

3. Halaman Show Pelanggan

The screenshot shows the 'Dashboard Super Admin' interface. On the left, there is a sidebar with various menu items: Dashboard, Kategori, Produk, Ongkir, Pesanan, Laporan, Harian, Bulanan, Pelanggan, and User. The main area is titled 'Dashboard > Pelanggan'. It features a search bar and a table with columns: No, Email, Name, Address, and Action. The table contains five rows of data, each representing a customer entry. A modal window titled 'Detail Pelanggan' is open over the table, displaying specific details for the first customer:

No	Email	Name	Address	Action
1.	pelanggan1	Detail Pelanggan		
2.	pelanggan2			
3.	pelanggan3			
4.	pelanggan4			
5.	pelanggan5			

Email User : Super Admin
Nama Lengkap : pelanggannnnn1
Nama Panggilan : pelanggan1
No Telepon : 085274532635
Alamat : Ulu Gadut, Padang

1-5 Data Ditampilkan

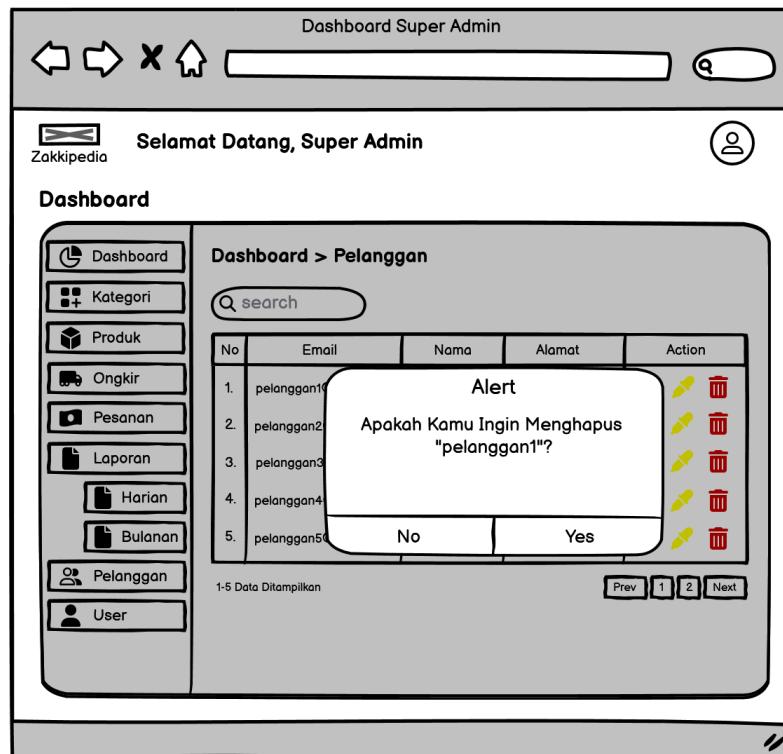

Prev 1 2 Next

4. Halaman Edit Pelanggan

The screenshot shows the 'Dashboard Super Admin' interface. On the left, there is a sidebar with various menu items: Dashboard, Kategori, Produk, Ongkir, Pesanan, Laporan, Harian, Bulanan, Pelanggan, and User. The main area is titled 'Dashboard > User > Edit Pelanggan'. It features a form titled 'Edit Pelanggan Baru' with the following fields:

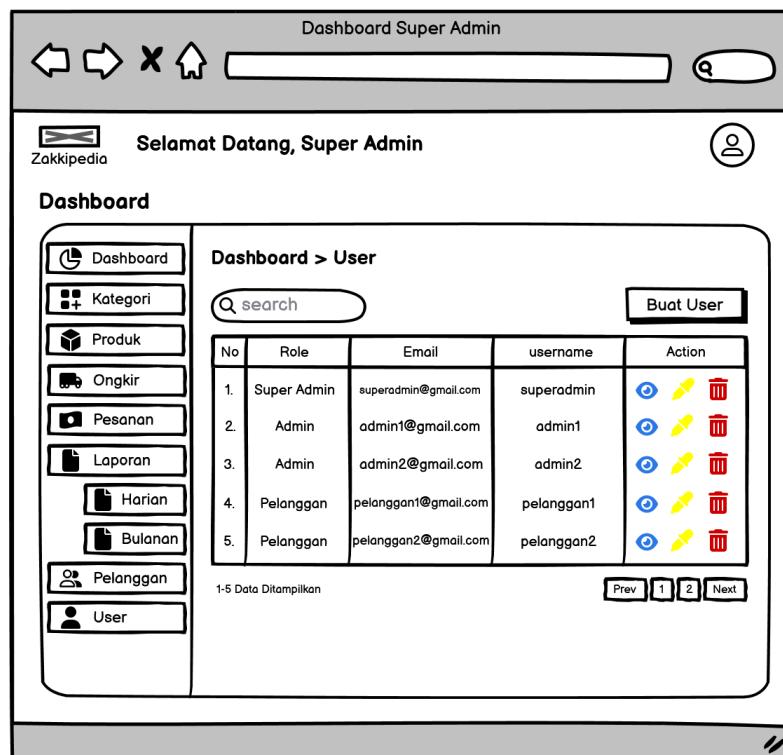

User	Nama Lengkap
enable	inputkan
Telepon	Nama Panggilan
inputkan	inputkan
Provinsi	Kota
pilih	pilih
Kecamatan	Kelurahan
pilih	pilih

5. Halaman Hapus Pelanggan

h. Halaman Menu User

1. Halaman Index User

2. Halaman Buat User

The wireframe shows a 'Dashboard Super Admin' header with navigation icons. Below it is a 'Selamat Datang, Super Admin' message and a user profile icon. The main area is titled 'Dashboard > User > Buat User'. It contains a back arrow labeled 'Buat User Baru', a 'Role' dropdown set to 'pilih', an 'Email' input field, an 'Email' label, a password input field, a 'Confirm password' input field, a 'Nama (Khusus Admin)' input field, an 'Alamat (Khusus Admin)' input field, and a 'Buat User Baru' button.

3. Halaman Show User

The wireframe shows a 'Dashboard Super Admin' header with navigation icons. Below it is a 'Selamat Datang, Super Admin' message and a user profile icon. The main area is titled 'Dashboard > User'. It features a search bar, a 'Buat User' button, and a table listing users. A modal window titled 'Detail User' is open, showing the details for user ID 1: Role: Super Admin, Email: superadmin@gmail.com, Username: superadmin, Name: -, and Address: -. The table below lists five users:

No	Role	Email	Username	Action
1.	Super Admin			
2.	Admin			
3.	Admin			
4.	Pelanggan			
5.	Pelanggan			

At the bottom, there is a note '1-5 Data Ditampilkan' and a navigation bar with 'Prev', '1', '2', and 'Next' buttons.

4. Halaman Edit User

The wireframe shows a 'Dashboard Super Admin' header with navigation icons. Below it is a 'Selamat Datang, Super Admin' message and a user profile icon. The main area is titled 'Dashboard' and contains a sidebar with links: Dashboard, Kategori, Produk, Ongkir, Pesanan, Laporan (Harian, Bulanan), Pelanggan, and User. The right side shows a form titled 'Edit User Baru' with fields for Role (dropdown menu 'pilih'), Email (text input 'inputkan'), Email (text input 'inputkan'), Password (text input 'inputkan'), Confirm password (text input 'inputkan'), Nama (Khusus Admin) (text input 'inputkan'), and Alamat (Khusus Admin) (text input 'inputkan'). A 'Edit User Baru' button is at the bottom.

5. Halaman Hapus User

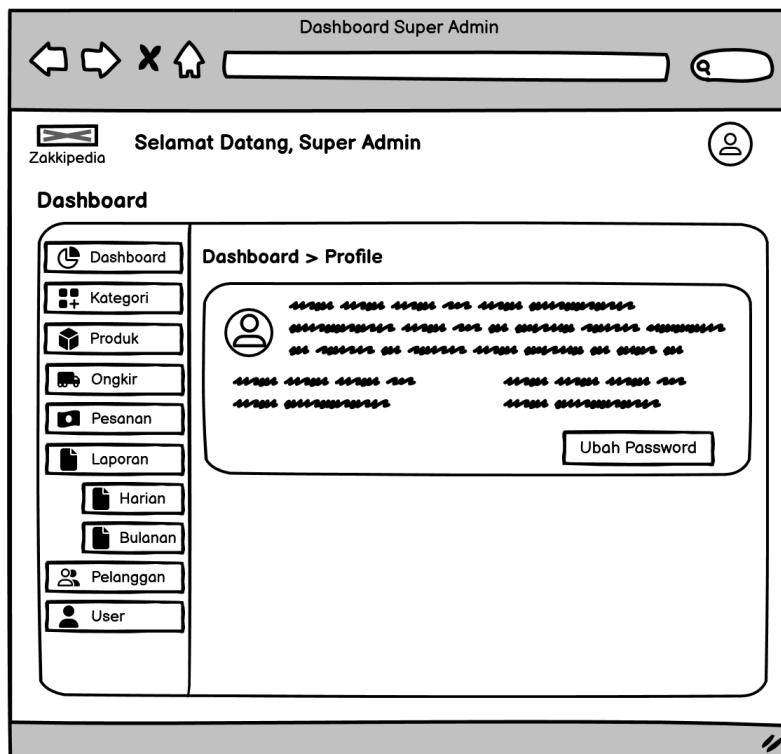

The wireframe shows a 'Dashboard Super Admin' header with navigation icons. Below it is a 'Selamat Datang, Super Admin' message and a user profile icon. The main area is titled 'Dashboard > User' and contains a sidebar with links: Dashboard, Kategori, Produk, Ongkir, Pesanan, Laporan (Harian, Bulanan), Pelanggan, and User. There is a search bar ('search') and a 'Buat User' button. A table lists users with columns: No, Role, Email, username, and Action. The table data is:

No	Role	Email	username	Action
1.	Super Admin			
2.	Admin			
3.	Admin			
4.	Pelanggan			
5.	Pelanggan			

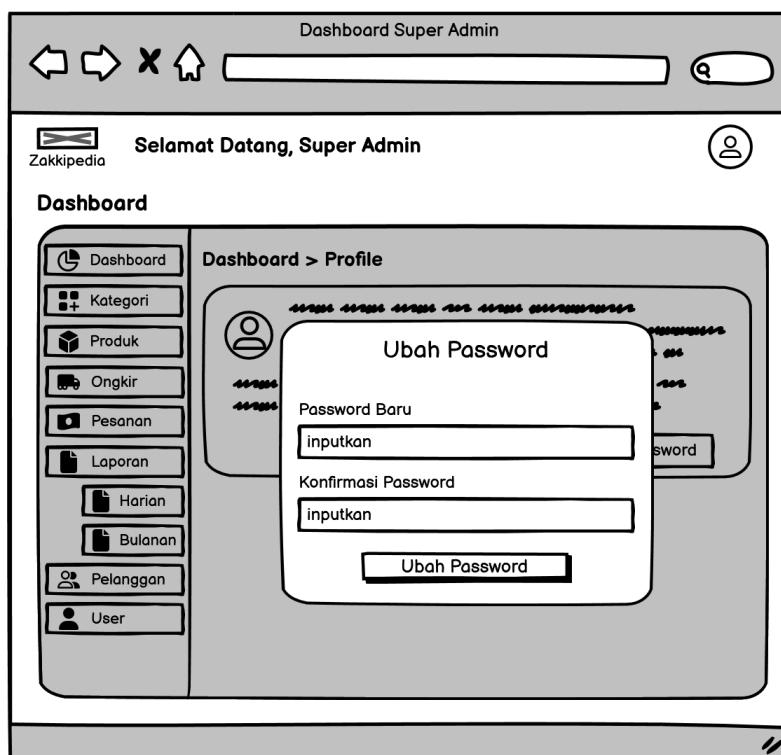

An 'Alert' dialog box is overlaid on the table, asking 'Apakah Kamu Ingin Menghapus "user1"?'. It has 'No' and 'Yes' buttons. At the bottom of the page, there is a message '1-5 Data Ditampilkan' and a navigation footer with 'Prev', '1', '2', and 'Next' buttons.

d. Halaman Menu Laporan

1. Halaman Laporan Harian

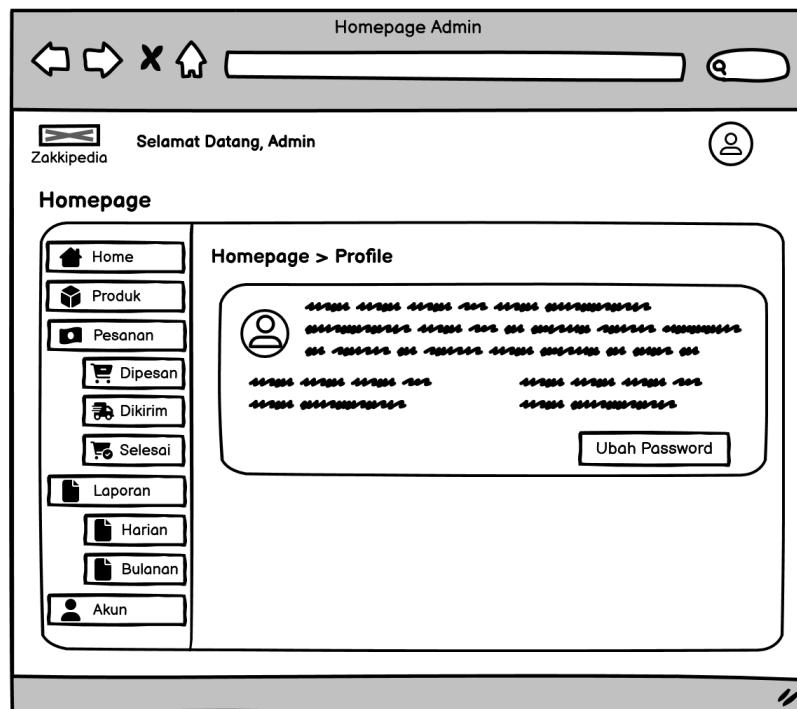

The wireframe shows a web browser window titled "Homepage Admin". The header includes standard navigation icons (back, forward, search, etc.) and a user profile icon. The top left corner displays "Selamat Datang, Admin" and the Zakkipedia logo. The main content area is titled "Homepage > Laporan Harian". On the left, there is a sidebar menu with the following items: Home, Produk, Pesanan, Dipesan, Dikirim, Selesai, Laporan, Harian, Bulanan, and Akun. The "Laporan" item is currently selected. The right side contains a form for generating a daily report. It has two input fields: "Tanggal Mulai" and "Tanggal Akhir", both with "pilih" placeholder text. Below these is a "Buat Laporan Harian" button.

2. Halaman Laporan Bulanan

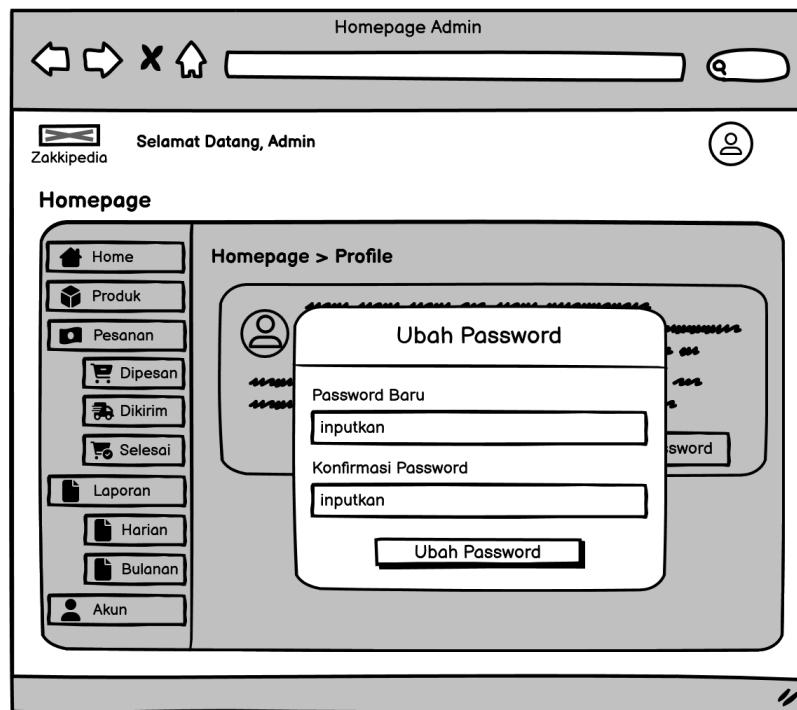

The wireframe shows a web browser window titled "Homepage Admin". The header includes standard navigation icons (back, forward, search, etc.) and a user profile icon. The top left corner displays "Selamat Datang, Admin" and the Zakkipedia logo. The main content area is titled "Homepage > Laporan Bulanan". On the left, there is a sidebar menu with the following items: Home, Produk, Pesanan, Dipesan, Dikirim, Selesai, Laporan, Harian, Bulanan, and Akun. The "Laporan" item is currently selected. The right side contains a form for generating a monthly report. It has two input fields: "Bulan" and "Tahun", both with "pilih" placeholder text. Below these is a "Buat Laporan Bulanan" button.

e. Menu Profile

1. Halaman Profile

2. Halaman Keranjang Pelanggan

3. Halaman Ubah Keranjang Pelanggan

4. Halaman Hapus Produk Keranjang Pelanggan

5. Halaman Isi Data Pesanan Pelanggan

The screenshot shows the 'Data Pesanan' (Order Data) page. At the top right, there is a shopping cart icon and a user profile icon. The main content area is titled 'Data Pesanan' and contains a form for shipping information. The form fields include:

- Pelanggan:
 - enable (checkbox)
 - pilih (dropdown menu)
 - Jalan (text input)
 - Inputan (text input)
- Daerah Kirim:
 - pilih (dropdown menu)
 - Kelurahan (dropdown menu)
 - Kode Pos (text input)
- Metode Pembayaran:
 - Pilih Metode Pembayaran (dropdown menu)

Below the form, there are three red text boxes displaying financial details:

- Pesanan : Rp. 400.000,00
- Ongkir : Rp. 20.000,00
- Total Pembayaran : Rp. 220.000,00

A button labeled 'Lakukan Pembayaran' (Perform Payment) is located at the bottom right of the form.

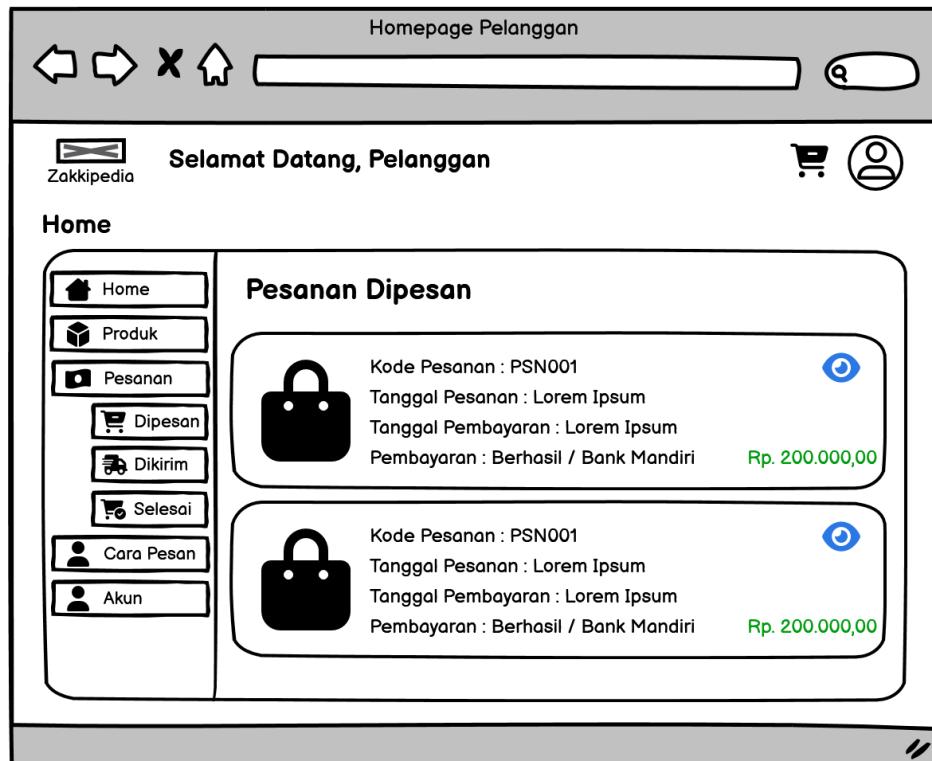

d. Menu Pembayaran

1. Halaman Pembayaran Pelanggan

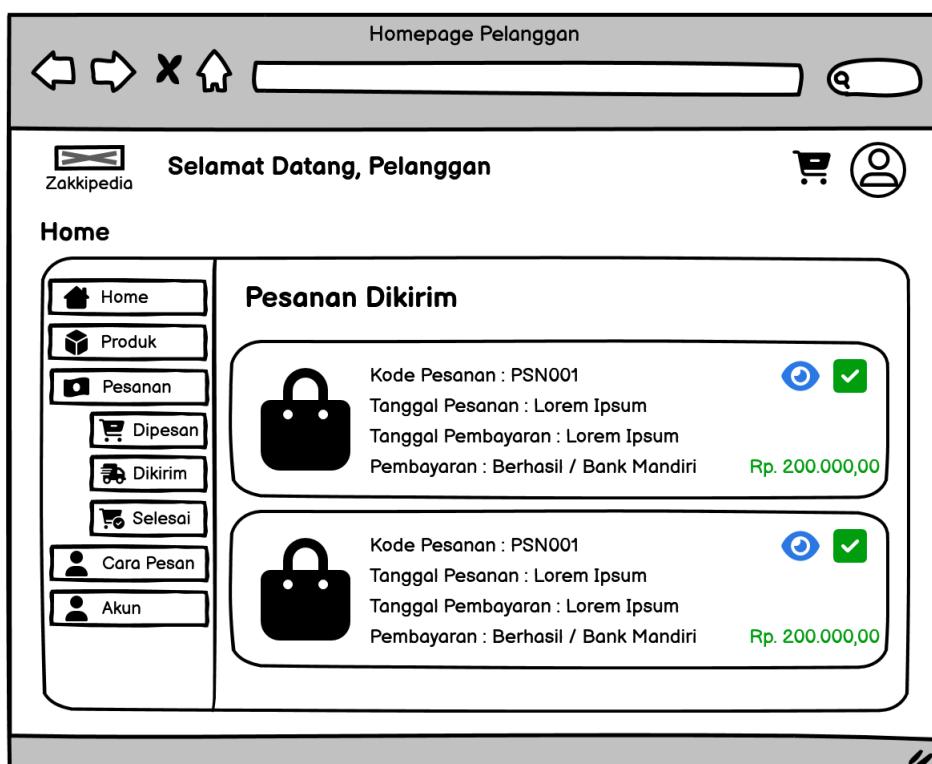

The screenshot shows the 'Pembayaran' (Payment) page, specifically the 'QR PEMBAYARAN' (QR PAYMENT) section. The main content area is titled 'Data Pesanan' and contains a QR code with a large 'X' drawn through it. Below the QR code, there is a section titled 'Tata Cara Pembayaran' (Payment Method) which contains a series of short horizontal lines.
